Special Report  
Passive Investment For  
Retirement Planning

The following table lists top-ranked equity funds based on DSIJ's proprietary research methodology. We have evaluated each funds underlying portfolio of stocks and ranked them based on their expected portfolio returns. In a similar way we calculated the risk of a fund based on its constituents. This helps us to 'rank' and assign 'risk' to newly launched funds also.

We continuously evaluate equity funds based on the changed ratings of their underlying stocks and the change in their prices. Therefore, this list is quite dynamic and reflects the best possible return potential of the funds for the next two years.

You can use this ranking to create your own mutual fund portfolio. Depending on your risk profile, return expectations and overall asset allocation, you can add the best performing fund category to your portfolio. For clarity and to include more funds, we have not included 'Direct' and 'close-ended' funds. You can visit our website ([www.dsi.in/mutual-fund](http://www.dsi.in/mutual-fund)) to check the entire list along with equity-oriented hybrid and close-ended funds.

This ranking can also be used for reviewing different holdings in your fund portfolio. Hence, a consistently laggard performer of a category can be looked at as 'Switch' or 'Exit' advice.
