Retail demand remains steady in 2Ws and PVs...

...tractor retails for Navratras below expectations

- When assessing retail demand momentum in Apr2024, it's important to consider the favorable baseline of last year compared to this year. In Mar'23, pent-up demand was evident due to the transition to OBD-2 norms (which had its adverse impact in Apr2023). Additionally, the occurrence of Chaitra Navratras in Apr'24 influenced consumer behavior. Accordingly, while demand has been steady for both 2Ws and PVs as per our interactions with channel partners, the occurrence of a low base and a festive month seem to be driving healthy YoY growth in retail sales for April. On the other hand, there was weakness in demand across regions, which had elections in Apr'24. 2W retail growth is expected to be ~20% YoY. PV retail growth is expected to be 10-15% YoY, driven by stable demand in UVs and CNG variants. MHCVs are expected to decline ~3% YoY and LCVs are expected to remain flat YoY. Tractors are expected to witness a retail decline of 5-7% YoY with commercial tractor retail demand declining 20-25% YoY. For Apr'24, we estimate dispatches for 2Ws/PVs/3Ws/CVs to grow 10%/7%/10%/3% YoY, while that of tractors to decline 11.5% YoY.
- 2Ws: Retails are expected to grow 20% YoY, aided by the low base of last year and nine days Navratras which were positive for 2W retails and contributed to incremental growth of 10-15% YoY. However, Gudi Padwa (occurred in March last year), an auspicious day in Maharashtra, saw a 5-7% YoY drop in retails as per our interactions with channel partners in Maharashtra. HMCL's Xtreme 125R seems to have been received well by the customers with allocation to dealers now improved at 40% of the demand (vs. 20% last month). The vehicle is still not available at all dealerships despite a strong initial demand. Dealers are quoting a waiting period of 7-10 days for the vehicle availability. As per a dealer in Tamil Nadu, Mavrick needs strong advertisement campaign from the company as the market of premium motorcycles is getting competitive. HF Deluxe experienced a decline in sales this month due to the absence of discounts, whereas HMCL's premium portfolio offered discounts of up to INR5k. Although RE's 450cc platform has been receiving positive feedback, dealers note the absence of a modern classic segment bike in RE's lineup for that segment. Inventory stands at 40-42 days for HMCL (post inventory correction in Mar/Apr) and 28-30 days for TVSL/BJAUT/HMSI. Inventory for RE stands at approximately 2 weeks. Most of the e-2W OEMs, except Ola, have increased prices following the reduction in subsidies in Apr'24. Ola has reduced prices of its S1X series by up to INR10k. We expect dispatches for HMCL/BJAUT/TVSL/RE to grow 14%/8%/10%/4% YoY over last year.
- PVs: Apr'24 retails are expected to grow 10-15% YoY, driven by healthy demand in UVs. North region retails are expected to grow in double digits, while southern retails growth is expected in single digits. Gudi Padwa retails in Maharashtra have largely remained flat or declined slightly on a YoY basis. Inquiries were minimal in regions with elections such as Tamil Nadu, but dealers seem confident demand would pick up, post this lean period. Entry-level demand continues to face pressure for MSIL, with discounts remaining consistent on a MoM basis. There are no discounts on MSIL's Brezza/Ertiga and

"Yes, I think things have stabilized, not just stabilized, they have improved since the last two or three quarters. The domestic market is turning in nice growth.

We expect the markets to be growing at about 7% to 8% in the coming year with the upper half of the industry growing at perhaps 2-3% points more and the bottom half, growing at 2-3% points less than the average of 7% to 8%."

TTMT's Nexon. The waiting period continues to remain under two months for MM's XUV700/ScorpioN. Inventory for all the key PV OEMs stood at 40-45 days. We expect dispatches to grow $^{7}\%/5\%/10\%$ YoY for MSIL/TTMT/MM (including pick-ups).

- CVs: While MHCV volumes are expected to decline 3% YoY, LCV volume growth is expected to remain flattish YoY. CVs required for mining remained muted, while construction and cement demand is doing fine. Bus demand continues to remain healthy and we expect a double-digit growth during the month. Large fleet operators are benefiting from higher discounting (~10-15% of cost of vehicle). LTV ratio continues to hover around 80-90%. Inventory stands at around 4-6 weeks for CVs. We expect dispatches for TTMT/AL/VECV to grow ~2%/2%/1% YoY.
- Tractors: Our channel checks for April 2024 indicates a subdued year-over-year growth of 1-3% for tractor volumes, despite the Navratri festival falling during the month. Southern states experienced a significant double-digit decline in sales, whereas growth in northern states were relatively better. In certain parts of Maharashtra, sales remained uninspiring even during Gudipadwa due to untimely rainfall, adversely impacting crops such as wheat and cotton, alongside stringent financing conditions. The decline was particularly severe for the nonagricultural tractor segment, with a noted 16-18% year-over-year decline in key regions. While Escorts had already announced a price hike, interactions confirmed John Deere too has announced the price hike. Conversely, Mahindra & Mahindra has reduced cash discounts previously offered to dealers. The average inventory level is currently at 5-6 weeks, with some northern states reporting inventory as high as 7 weeks. We expect dispatches for MM to decline ~14% YoY while ESC remains flat.
- Valuation and view: We are positive on the PV segment, which is expected to see better earnings growth, led by improved mix, which is in turn driven by outperformance in SUVs. While expected volume growth for the two-wheeler sector at high single digits is likely to be better than other segments, most of it seems already priced in the recent run-up of stocks. Also, we expect CV demand to remain weak in the near term, closer to Elections, and then pick up pace from 2HFY25. Within auto OEMs, we like MSIL, AL, and MM. Among auto component stocks, we prefer CRAFTSMA and Happy Forgings.
