Adani Ports & SEZ: In-line performance; outlook remains bright

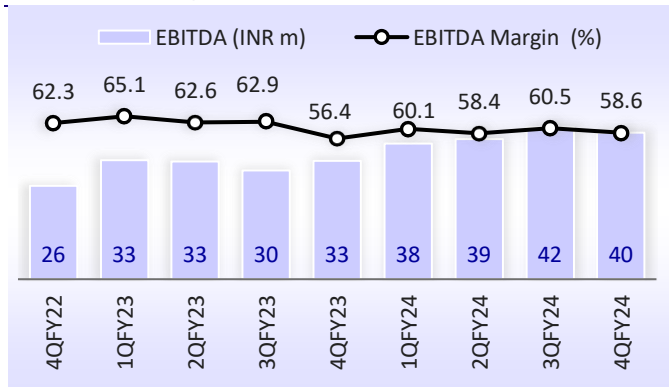

- ❖ Adani Ports & SEZ (APSEZ) reported a revenue growth of 19% YoY to INR68.9b in 4QFY24 (in line). During the quarter, APSEZ recorded 26% YoY growth in cargo volumes to reach 108.8 MMT.
- ❖ EBITDA margin came in at 58.6% in 4QFY24 vs. our estimate of 59.4% (up 220bp YoY, down 190bp QoQ). While EBITDA grew 24% YoY to INR40.4b, APAT increased 11% YoY to INR22.9b (in line with our estimate).
- ❖ In 4QFY24, port revenues rose 24% YoY to INR54.7b and EBITDA margins stood at 70% (flat YoY). Logistics revenues grew 5% YoY to INR5.6b and EBITDA margins stood at 18.7% (vs. 24.8% in 4QFY23).
- ❖ The 4Q performance was largely in line with our estimates. APSEZ is expected to record 2-3x of India's cargo volume growth, driven by a balanced port mix on the western and eastern coastlines of India and an operational ramp-up at the recently acquired ports. Further, the logistics business will also serve as a value addition to the domestic ports business with a focus on enhancing last-mile connectivity. We expect APSEZ to report 11% growth in cargo volumes over FY24-26. This would drive a CAGR of 14%/15%/19% in revenue/EBITDA/PAT over FY24-26. We largely retain our estimates and reiterate our BUY rating with a revised TP of INR1,550 (based on 17x FY26E EV/EBITDA).

APSEZ surpasses cargo volume guidance in FY24, delivers 3x of India's cargo growth rate

- By handling 420MMT of cargo volume in FY24, APSEZ handled ~27% of the country's total cargo and ~44% of container cargo.

- APSEZ targets cargo volumes of 460-480 MMT in FY25. This would be driven by a ramp-up of newly acquired ports and higher utilization of existing ports. APSEZ sees a minimal impact of the Red Sea issue on its cargo volumes.

Last-mile connectivity to bolster growth in the Logistics business

- In 4QFY24, Adani Logistics (ALL) posted ~5% YoY growth in revenue and EBITDA margins of 18.7% (24.8% in 4QFY23).
- During FY24, APSEZ initiated a trucking business segment, deploying 900 trucks to offer last-mile connectivity for customers from ports, inland container depots (ICDs), and customer premises.

- ALL currently operates 12 multi-modal logistics parks (MMLPs), equipped with 127 trains, 2.4m sq. ft. of warehousing space, and 1.2mmt of grain silos. ALL plans to expand its footprint and build a pan-India presence in the form of logistic parks and warehouses.

Highlights from the management commentary

- With the acquisition of Gopalpur and Karaikal ports, the total count of ports in India portfolio increased to 15 with total capacity of ~627 MMT as of Mar'24.
- Regarding the impact of the Red Sea on FY25 volume guidance, the management has stated that the company is not facing any challenges and any risks are covered by additional opportunities. APSEZ demonstrated resilience to the Red Sea issue, with a 12% YoY volume growth reported in Apr'24.
- During FY24, APSEZ initiated a trucking business segment, deploying 900 trucks to offer last-mile connectivity for customers from ports, inland container depots (ICDs), and customer premises.
- As per the management, cargo volumes are expected to range from 460 to 480 MMT in FY25, with revenue projected to be ~INR300b.

Valuation and view

- APSEZ is anticipated to outpace India's overall growth, driven by a balanced port mix along India's western and eastern coastlines and a diversified cargo mix. The company continues to invest heavily in the ports and logistics business to drive growth. The newly launched trucking segment enables APSEZ to provide the last-mile connectivity solution to its customers.
- We expect APSEZ to report 11% growth in cargo volumes over FY24-26. This would drive a CAGR of 14%/15%/19% in revenue/EBITDA/PAT over FY24-26. We largely retain our estimates and reiterate our BUY rating with a revised TP of INR1,550 (premised on 17x FY26E EV/EBITDA).

Its key focus areas would be Logistics optimization, reduction in energy and raw materials costs. It aims to commission clinker/grinding capacity of 4mtpa/4.8mtpa by 4QFY25.
- We maintain our earnings estimate for FY25/FY26. ACEM trades at 19.6x/16.8x FY25E/FY26E EV/EBITDA (standalone). We maintain our Neutral rating on the stock as we await clarity on the expansion plans of the company.

- Consol. capex stood at INR45b in FY24 and the company plans to further spend INR50-60b in FY25 toward its growth plans.

Valuation and view

- The management guides for further cost-reduction initiatives by increasing the share of green power and alternative fuel resources (AFR), engaging in long-term procurement strategies for critical raw materials, and optimizing logistics. Successful execution of these plans could result in a positive surprise.

- Cholamandalam Inv. & Finance (CIFC)'s 4QFY24 PAT grew ~24% YoY to INR10.6b (9% beat). NII grew ~33% YoY to ~INR23.5b (in line). FY24 PAT rose 28% YoY to INR34.2b.
- Other income jumped ~89% YoY to ~INR5.6b (28% beat). Management expects the fee income to continue growing in line with business growth.
- Opex, in 4QFY24, rose ~63% YoY to ~INR12.85b (15% higher than est.), while the cost-to-income ratio rose ~6pp YoY to ~44% (PY: ~38%). This was primarily due to investments in newer businesses, annual incentives, and CSR expenses. Earlier during the year, the company also moved a large proportion of its outsourced employees to its own payroll.
- GS3/NS3 declined ~35bp/20bp QoQ to 2.5%/1.3%, while PCR on S3 rose ~130bp to ~46%. ECL/EAD declined to 1.72% (PQ: ~2%). 4QFY24 credit costs stood at ~INR1.9b, which translated into annualized credit costs of ~0.5% (PQ: ~1.1% and PY: 0.5%).
- Disbursements were strong at ~INR248b (in line) and grew 18% YoY. Newer lines of businesses contributed ~23% to the disbursement mix (same as the prior quarter).
- NIM (calc.) remained stable QoQ, but core spreads (calc.) declined ~15bp to 6.2%, due to a decline in yields (calc.) by ~20bp QoQ. Management expects the CoB to increase slightly due to liability mix diversification. We model NIM of ~6.8%/6.9% in FY25/FY26.
- We estimate a disbursement/AUM/PAT CAGR of 21%/27%/34% over FY24-FY26. CIFC has levers on cost ratios and business AUM growth to deliver a healthy RoA/RoE of ~2.7%/22% in FY26. We believe in CIFC's ability to sustain profitable growth in this franchise. We reiterate our **BUY rating on the stock with a revised TP of INR1,500 (based on 4.0x FY26E BVPS)**.
- Key risks to our TP are:** 1) higher delinquencies and credit costs in new businesses, particularly CSEL; and 2) pronounced cyclicality in the vehicle finance business, despite management making efforts to mitigate it.

Key highlights from the management commentary

- Management guided for FY25 disbursement growth of ~20-25% and AUM growth of ~25-30%.
- CIFC will endeavor to get to a PBT-RoTA of ~3.7% (FY24: 3.4%), at the company level, over the next two years. RoA expansion in newer businesses will come from higher productivity and improvement in opex ratios.
- Weighted average CoB stood at ~8%. During the course of the year, diversification of its liability mix can result in a slight increase in the CoB.

Valuation and view

- CIFC is a franchise equipped to deliver strong AUM growth with benign credit costs (relative to peers), translating into a sustainable RoE of ~21-22% across economic cycles.

■ The stock trades at 3.5x FY26E P/BV. We believe that these premium valuation multiples will sustain as investor confidence improves in the company's execution capabilities in newer product lines and in its ability to successfully tide over the sectoral stress in personal loans. **Reiterate BUY.**

- Dabur's 4QFY24 revenue growth was largely in line, but EBITDA was above our estimate. Consolidated revenue increased 5% YoY (in line) and 7% YoY in constant currency (cc) terms. For the India business, volume grew 4% YoY (organic growth at ~3% YoY). International business grew 12% YoY in cc.
- The HPC business sustained a healthy growth of 9% YoY, with oral care clocking 22% growth (led by price hikes, share gains, and distribution expansion). Dabur has become the No. 1 oral care player in the markets of Odisha, Karnataka, and AP. In the HPC category, Hair Oil declined 3% YoY, while Home Care, Shampoo, and Skin Care clocked 8%, 6%, and 1% YoY growth, respectively.
- Seasonal businesses, such as the Healthcare division, declined 2% YoY, while F&B was flat YoY. Delay in the winter season impacted health supplement growth adversely; both chyawanprash and honey were weak despite gaining market share. Beverages were hit by the high base. Badshah was up 23% YoY in FY24.
- GM improved 280bp YoY to 48.6% (in line). Conversely, high A&P spending (up 21% YoY) restricted EBITDA margin expansion to 130bp YoY to 16.6% (est. 15.7%). EBITDA growth was healthy, at 14% YoY.
- With an improving volume trajectory and a price hike benefitting revenue (unlike peers), we expect revenue growth acceleration in the ensuing quarters. Dabur's own initiatives around distribution, new launches, and marketing spend will further boost the growth. The operating margin also has scope for improvement in the medium term, hovering around the ~20% band over the last eight to nine years (unlike peers that enjoyed expansion). **We value Dabur at 48x FY26E EPS to arrive our TP of INR650. We reiterate our BUY rating on the stock. Dabur is our top pick in the staples space.**

Sales in line with broad-based growth

Consolidated

- **Dabur reported 5% YoY growth in net sales** at INR28.2b (est. INR28.4b); constant currency growth was at 7% YoY. EBITDA/PBT/adj. PAT increased 14%/14%/11% YoY to INR4.7b/INR4.5b/INR3.5b (est. INR4.5b/INR4.9b/INR3.3b).
- **Volume growth in the mid-single digit:** Domestic volume growth (including Badshah) was at 4.2% YoY in 4QFY24, while volume grew 5.5% YoY in FY24.
- **The non-seasonal portfolio performed well**, with oral care being the showstopper, clocking 22% YoY growth in 4QFY24. Health supplements and beverages were down 9% and 2%, respectively.
- **Beat on margin:** GP margin expanded 280bp YoY to 48.6% (est. 48.5%). As a percentage of sales, ad spending (+90bp YoY to 7%), other expenses (+20bp YoY to 14%), and staff costs (+50bp YoY to 11%) were stable. Consequently, the EBITDA margin expanded 130bp to 16.6% (est. 15.7%).

- **International business delivered a double-digit growth:** International business grew 12% YoY in cc terms in 4QFY24 and 16% YoY in FY24. In 4QFY24, the Egypt business rose 63% YoY, while the Turkey business was up 39% YoY, and the Middle East & North Africa (MENA) markets posted a growth of 6.3% YoY. The Sub-Saharan Africa business rose 23.8% YoY.
- **In FY24:** Net sales/EBITDA/Adj. PAT increased 8%/11%/9% YoY. Badshah reported 23% YoY growth. About 95% of Dabur's portfolio witnessed gains in market share.

Highlights from the management commentary

- The FMCG sector experienced consistent YoY volume growth. The company is optimistic of a gradual uptick in consumption trends in FY25, considering normal monsoons, improving macros, continued government spending, and lower inflation.
- The rural coverage expanded by 22,000 villages to 0.12m villages (headroom for growth available as potential villages are 0.6m). The rural distribution has been the highest in the industry, which puts Dabur in an advantageous position. Due to this investment, Dabur's rural business grew 400bp ahead of urban; rural grew at 8% YoY, while urban rose only 4% YoY.
- Oral care delivered a strong growth of 22% YoY in 4QFY24, with 23% growth in toothpaste. Dabur is the No. 2 player in oral care in India. However, in Odisha, Karnataka and Andhra Pradesh it is the No. 1 player.
- Management expects mid-to-high-single-digit volume growth and high-single-to-low-double-digit revenue growth in FY25.
- Management has guided for a 20% operating margin (including legal costs) for the near term.
- Management expects a double-digit growth in FY25 in beverages, if the weather conditions remain favorable.

Valuation and view

- There are no material changes to our FY25E/FY26E estimates.
- Unlike other FMCG companies, Dabur has consistently witnessed a higher rural growth compared to urban regions. With improving volume trajectory and no price-cut impact on revenue (unlike peers), we expect revenue growth outperformance to sustain in the near term. The operating margin also has a scope for improvement in the medium term, hovering around the ~20% band, over the last eight to nine years (unlike peers that enjoyed expansion). **We value Dabur at 48x FY26E EPS to arrive our TP of INR650. We reiterate our BUY rating on the stock. Dabur is our top pick in the staple space.**

Earnings in line; asset quality improves

Restructured book declines to ~1.0%

- FB reported a mixed quarter as net earnings stood at INR9.1b (in line), led by lower other income and higher opex (wage provisioning of INR1.62b). NII was in line with our estimate, aided by a 2bp QoQ expansion in margins.
- Advances growth was healthy at 20% YoY/5.1% QoQ. Deposits grew 18% YoY/5.4% QoQ, aided by continued traction in term deposits. The CASA ratio moderated 125bp QoQ to 29.4%.
- Fresh slippages moderated to INR3.5b from INR4.8b in 3QFY24. GNPA/NNPA ratios improved 16bp/4bp QoQ to 2.1%/0.6%. Restructured book declined ~14bp QoQ to 1.0%.
- FB reported RoA/RoE of 1.2%/12.8% in 4QFY24. We fine-tune our estimates and expect FB to deliver RoA/RoE of 1.36%/15.1% in FY26. **We reiterate our BUY rating on the stock.**

Business growth steady; NIM expands 2bp QoQ

- FB reported net earnings of INR9.1b (flat YoY, in line), led by lower other income and higher opex. NII stood at INR21.95b (in line), while NIM expanded 2bp QoQ to 3.21%. In FY24, PAT grew 24% YoY to INR37b vs. INR30b in FY23.
- Other income declined 12.6% QoQ to INR7.5b (12% lower than MOFSLe), treasury gains stood at INR1.3b in 4QFY24 vs. INR2.2b in 3QFY24.
- Opex rose 40.5% YoY (up 18.7% QoQ, 6% higher than MOFSLe), largely due to wage-related provisions of INR1.6b. The C/I ratio, thus, increased 1,049bp QoQ to 62.3%. PPop declined 16.8% YoY (16% lower than MOFSLe), further affected by slower growth in other income.
- On the business front, advances grew 20% YoY/5.1% QoQ to INR2.1t, led by healthy growth in agriculture (up 5.4% QoQ). Deposits grew 18% YoY (up 5.4% QoQ), driven by faster growth in TDs. As a result, the CASA ratio declined 125bp QoQ to 29.4%.
- Fresh slippages moderated to INR3.5b from INR4.8b in 3QFY24. GNPA/NNPA ratios improved 16bp/4bp QoQ to 2.1%/0.6%. PCR was flat at 72.3%. Restructured book declined ~14bp QoQ to 1.0%.

Highlights from the management commentary

- For FY25, excluding the one-time impact of INR1.6b, operating expenses are expected to remain stable with a 5% increase.
- The bank aims for 5-7% growth in branch expansion, with branches reaching breakeven at an accelerated rate. FB targets to add 100 branches in FY25.
- Loan book composition: 52% is linked to EBLR, 27% is fixed, 11% is linked to MCLR, and the rest is linked to others/base rate.

Valuation and view

FB reported a broadly in-line performance, with robust business growth and improved asset quality. However, lower other income and higher opex due to residual wage provisions led to a miss in operating profits. NIMs expanded marginally to 3.21%, and the management expects margins to improve slightly over FY25 as improvements in lending yields offset the rise in funding costs. We broadly maintain our estimates as improvements in operating leverage, along with steady business growth and margins, will keep earnings robust. We estimate FB to deliver RoA/RoE of 1.36%/15.1% in FY26. **We reiterate our BUY rating on the stock with a TP of INR195 (1.3x FY26E ABV).**

Higher opex leads to EBITDA/PAT miss

Aims to consistently outperform the industry in branded generics

- Ajanta Pharma (AJP) delivered in-line sales in 4QFY24. However, EBITDA/PAT came in lower than our expectations, due to higher opex and higher tax outgo. AJP continued to outperform the industry in domestic formulation (DF) and Asia market. The performance is expected to improve in the Africa branded generics market going forward.
- We cut our estimates by 6%/7% for FY25/FY26, factoring in a) moderation in US growth prospects, b) higher logistics costs due to ongoing geopolitical tension, and c) a higher tax rate. We value AJP at 27x 12M forward earnings to arrive at a TP of INR2,565.
- We expect a 17% earnings CAGR over FY24-26, backed by a 12%/15% sales CAGR in DF/Asia segment and a 150bp margin expansion. With new launches, MR addition and increased market share in existing products, AJP remains in good stead to outperform in the branded generics market (70% of FY24 sales). AJP continues to build the ANDA pipeline for the US market and implement efforts toward consistent compliance. Maintain BUY.

- Castrol's (CSTR) revenue grew 2% YoY to INR13.3b in 1QCY24, driven by 5% YoY growth in volumes; however, EBITDA margin declined to 22.2%, mainly due to higher raw material cost and other expenses during the quarter. The company has not taken any significant price hikes in 1QCY24. Unfavorable sales mix also negatively impacted margin during the quarter.
- Management highlighted that it remains focused on its commitment to brand building, widening its distribution network, and launching new products, all of which we believe will contribute positively to volume and market share expansion.
- Management maintains a bullish outlook on India as a market, foreseeing robust demand for lubricants persisting until the late CY30s and early CY40s, largely attributed to the low penetration of cars in the country. While the threat from EVs is real, its adoption is expected to occur gradually.
- Despite a weaker-than-expected start to CY24, we increase our volume growth to 4% each for CY24/25 vs. 3% each previously. Management maintained its guidance of growing at higher than industry average growth rate of 4-5%, while simultaneously aiming for 22-25% EBITDA margin on a full-year basis. We are building in 24/25% EBITDA margin in CY24/25.
- CSTR has always enjoyed strong brand legacy, and we are confident in its ability to maintain profitability through an improved product mix, stringent cost-control measures, and the launch of advanced products that command better realization. **We reiterate our BUY rating on the stock with a TP of INR240.**

Realization declines along with input costs

- Revenue stood at INR13.3b (in line with our est., +2% YoY)
- EBITDA stood at INR2.9b (our est. at INR3.3b, flat YoY) due to higher-than-expected RM cost and other expenses
- EBITDA margin stood at 22.2% (vs. 22.8% in 1QCY23)
- PAT stood at INR2.2b (our est. of INR2.4b, +7% YoY)

Other key highlights

- Empowered 12k truckers in 31 cities nationwide.
- Castrol POWER1's 'India's Ultimate MotoStar' garnered over 10,000 registrations nationally, especially from tier II and III cities.
- CSTR has expanded its footprint to over 9k multi-brand passenger car workshops and nearly 28k independent bike workshops.

Valuation and view

- CSTR has maintained robust return ratios above 40% in CY23 and we are building in a similar return profile in CY24-25. The stock trades at 19x CY25E EPS of INR10.5. We value the stock at 23x CY25E EPS to arrive at our TP of INR240. **We reiterate our BUY rating on the stock.**

- Atul (ATLP) reported in-line revenue in 4QFY24. Revenue in the Life Science Chemicals segment declined 8% YoY, while it increased 5% YoY in the Performance & Other Chemicals segment. **Gross margin came in at 49.7% (+390bp YoY), while EBITDAM contracted 30bp YoY to 12.2% during the quarter.** PAT declined 36% YoY to INR588m in 4QFY24.
- Management highlighted that there was pricing pressure, although volumes have improved in some of the businesses that have done well throughout FY24. A couple of subsidiaries have suffered losses at the PBT level, which has led to a decline in earnings of the consolidated entity. Volume growth was driven by consumption, and management is confident of achieving higher volume growth in FY25.
- The Life Science Chemicals' contribution to EBIT was stable at 84% (same in 4QFY23), whereas the contribution of Performance & Other Chemicals to overall EBIT increased to 16% in 4QFY24 (from 15% in 4QFY23). Crop Protection, Colors, Polymers, and Bulk Chemical segments were under pressure. There was also less demand for products in the Performance and Other Chemicals segment.
- Due to the underperformance in FY24, we cut our EPS estimate by 5% for FY25 and EBITDA/EPS estimate by 5%/11% for FY26.** We estimate a revenue/ EBITDA/PAT CAGR of 10%/17%/25% during FY24-26 due to the lower base in FY24 (earnings declined 39% YoY in FY24). EBITDAM is estimated to improve by 160bp in FY26 vs. FY24 level.
- The stock is trading at 37x FY26E EPS of INR162 and 20.7x FY26E EV/EBITDA.** We value the stock at 35x FY26E EPS to arrive at our TP of INR5,670. **We reiterate our Neutral rating on the stock.**

Marginal beat on EBITDA; PAT miss due to higher depreciation & interest costs

- Revenue stood at INR12.1b (+1% YoY). Life Science Chemicals' revenue stood at INR3.8b (-8% YoY). Performance Chemicals revenue was INR8.7b (+5% YoY).
- Gross margin came in at 49.7% (+390bp YoY), while EBITDA margin stood at 12.2% (-30bp YoY). EBIT margin contracted materially for the Life Science Chemicals segment on YoY basis. Life Science Chemicals' margin stood at 17.7% (-450bp YoY); EBIT was at INR667m. Performance Chemicals' margin stood at 1.5% (-40bp YoY); EBIT was at INR129m.
- EBITDA came in at INR1.5b (est. of INR1.4b, -1% YoY). PAT stood at INR588m (est. of INR718m, -36% YoY), resulting in an EPS of INR19.9. Contributions from the subsidiaries/JVs remained negative (loss of INR161m in 4QFY24 vs. a loss of INR377m in 3QFY24 and a PAT of INR38m in 4QFY23).

- **For FY24**, revenue stood at INR47.3b (-13% YoY), EBITDA was at INR6.4b (-18% YoY), and PAT stood at INR3.2b (-36% YoY). EBITDAM came in at 13.5% (down 80bp YoY). For Life Science Chemicals, revenue stood at INR14.3b (-27% YoY), EBIT was at INR2b (-52% YoY), while EBITM stood at 14.2% (-730bp YoY). For Performance & Other Chemicals, revenue stood at INR34.5b (-7% YoY), EBIT came in at INR2.4b (flat YoY), while EBITM was at 6.9% (+50bp YoY).
- The BoD has recommended a dividend of INR20/share (200% of FV) for FY24. The Board also re-appointed Mr. Gopi Kannan Thirukonda as WTD, effective 17th Oct'24, for a period of three years.

Valuation and view

- We highlight that the continued weakness in the agrochemical industry will have an adverse impact on earnings in the short to medium term. ATLP is also facing teething issues while stabilizing its operations and is unable to reach the desired product quality and production. We expect the ongoing earnings fluctuation to continue until these issues are resolved.
- **The stock is trading at 37x FY26E EPS of INR162 and 20.7x FY26E EV/EBITDA.** We value the stock at 35x FY26E EPS to arrive at our TP of INR5,670. We reiterate our Neutral rating on the stock.
- The upside risk could be a faster-than-expected ramp-up of new projects and products. Downside risks include weaker-than-expected revenue growth and further margin compression.

Strategy: Gathering momentum; midcaps/smallcaps outperform

- Nifty maintains its winning streak:** The Nifty ended 1.2% higher MoM at 22,605 in Apr'24 after making new highs of 22,783. The index has closed higher for the third straight month now. Notably, the index was extremely volatile and swung around 1,006 points before closing 278 points higher. The Nifty is up 4% in CY24YTD. Midcaps/smallcaps outperformed largecaps by 4.6%/10.2% in Apr'24. Similarly, in CY24YTD, midcaps/smallcaps have outperformed largecaps and have risen 10.1% and 12.3%, respectively, vs. a 4% rise for the Nifty.
- DII inflows remain strong; FII record outflows:** DIIs recorded the nine consecutive month of inflows in Apr'24 at USD5.3b. FIIs recorded outflows of USD1.1b in Apr'24. FII inflows into Indian equities stand at USD0.3b in CY24YTD vs. inflows of USD21.4b in CY23. DII inflows into equities in CY24YTD continue to be strong at USD18.4b vs. USD22.3b in CY23.
- Breadth balanced in Apr'24:** Among sectors, Metals (+11%), PSU Banks (+9%), Telecom (+8%), Real Estate (+8%), and Utilities (+8%) were the top gainers, whereas Technology (-5%) and Healthcare (flat MoM) were the only laggards. Divis Labs (+16%), Hindalco (+15%), Eicher Motors (+14%), M&M (+12%), and Axis Bank (+11%) were the top performers, while HCL Tech (-11%), Kotak Mahindra Bank (-9%), HDFC Life (-8%), Sun Pharma (-7%), and Cipla (-6%) were the key laggards.
- India among the positive performing markets in Apr'24:** Among the key global markets, the UK (+2%), China (+2%), India (+1%), Russia MICEX (+1%), and Taiwan (+1%) ended higher in local currency terms. However, Japan (-5%), the US (-4%), Korea (-2%), Brazil (-2%), and Indonesia (-1%) ended lower MoM in Apr'24. Over the last 12 months, the MSCI India Index (+36%) has significantly outperformed the MSCI EM Index (+7%). Over the last 10 years, the MSCI India Index has notably outperformed the MSCI EM index by a whopping 213%.
- Corporate earnings in line with estimates so far in 4QFY24:** Corporate earnings so far have been in line with our estimates in 4QFY24, with the overall performance led by heavyweights such as HDFC Bank, ICICI Bank, Maruti Suzuki, TCS, and Bajaj Finance. The spread of earnings has been decent, with 73% of MOFSL Universe either meeting or exceeding profit expectations. However, growth has been led by the BFSI and Automobile sectors.
- Our view:** We see three important factors that are likely to dominate investor conversations: **1) Political continuity:** With Lok Sabha elections scheduled for Apr-Jun'24, multiple opinion polls are predicting a return of the BJP-led NDA government with a full majority for an unprecedented third term. This augurs well for sustained economic reforms and continued policy momentum, with a focus on capex, manufacturing, and infrastructure development. However, this could keep equity market multiples elevated, in our view. **2) Consumption slowdown:** Both macro and micro indicators suggest a persistent weakness in consumption, particularly noticeable in rural India. With inflation moderating and predictions of a normal monsoon, coupled with election spending, we expect consumption trends to bottom out and contribute to growth in 2HFY25. **3) Institutional flows:** DII + FII flows stood at ~USD50.5b in FY24, the highest ever in any financial year. The continued rise in retail participation, along with increasing SIP contributions and the addition of new demat accounts (over 3.6m accounts per month during Oct'23-Mar'24) amid the ongoing trend of financialization of savings, has supported the markets in the face of global volatility. We remain OW on Financials, Consumption, Industrials and Real Estate. Industrials, Consumer Discretionary, Real Estate, and PSU Banks are our preferred investment themes.
- Top ideas:** **Largecaps** – ICICI Bank, SBI, L&T, TITAN, ITC, HCL Tech, Coal India, M&M, Zomato, and Hindalco; **Midcaps** and **Smallcaps** – Indian Hotels, Godrej Properties, Global Health, KEI Industries, PNB Housing, KOEL, Cello World, Sobha, Lemon Tree Hotel, and JK Cement.

Stock Performance (1-year)

Multi-modal logistics services at play; well placed to capitalize on the opportunities

- Transport Corporation of India (TRPC) is projected to achieve consistent growth ahead, driven by a) a rising proportion of LTL shipments within the freight division (37% in 9MFY24, up from 35% in FY23), b) sustained demand in the automotive sector, bolstering the supply chain division, and c) the accumulating advantages from the expansion of multi-modal logistics. With an expansive fleet exceeding 10,000 trucks, six cargo ships, and 14m sq. ft. of warehouse space, the company is well-positioned for continued growth.
- Additionally, the company's presence across the multimodal logistics value chain (including a JV with Container Corporation of India Ltd (CCRI) for rail transportation and a fleet of ships for waterway transportation enables it to offer efficient end-to-end logistics solutions.
- While the freight services business is expected to benefit from the shift to organized sectors from the unorganized ones, the supply chain division is anticipated to experience a robust recovery, driven by continued growth momentum in the automotive sector. **We reiterate our BUY rating with a revised TP of INR1,025 (based on a P/E multiple of 17x FY26E EPS).**

While 9MFY24 has been muted, outlook remains strong

- TRPC experienced flattish growth in its freight services in 9MFY24 due to a general slowdown in the economy and competitive pressures. Management has a strategic goal of increasing the proportion of high-margin LTL services in its overall freight mix. Currently, the LTL share stands at 37%, and the company aims to raise it to 40% by the end of FY25. This shift in the freight mix is driven by the favorable market conditions and the potential for greater profitability in the LTL segment. We expect a revenue CAGR of 11% over FY23-26.
- The Seaways segment saw a 10% YoY decline in revenues in 9MFY24 due to lower freight rates and dry dock of a ship. The Seaways revenues are expected to improve going forward. As the segment is the highest margin segment for TRPC, higher revenues from this segment would mean strong overall earnings growth for the company.
- Within the Supply Chain business, the sustained recovery in automotive demand – which accounts for ~80% of Supply Chain revenue – is projected to drive growth. The integrated supply chain market is predicted to achieve ~15% CAGR over FY23-28, with the organized market posting even faster growth.

Valuation and view

- TRPC benefits from a diverse customer base, mitigating the risks associated with over-reliance on specific clients or industries.
- The improving share of LTL services within the Road Freight division is a positive sign for TRPC. LTL services generally offer higher margins and can contribute significantly to the company's overall profitability.
- We expect TRPC to achieve a CAGR of 15%/20%/18% in revenue/EBITDA/PAT over FY24-FY26. We reiterate our BUY rating on the stock with a TP of INR 1,025, based on 17x FY25E EPS.

- Margins and ROCE in the freight business have experienced a slight decline, primarily attributed to flattish revenue growth. The general economic demand slowdown has impacted growth within the freight division. TRPC has added 30 new branches during 9MFY24 to strengthen its network.
- The freight division is likely to benefit from a higher LTL contribution (40% by FY25E vs. 37% in 9MFY24), a shift from the unorganized sector, and traction in multi-modal logistics. We expect a revenue CAGR of 14% over FY24-26.

TCI Supply Chain: Growth momentum continues with upward trend in automotive sector

- The supply chain division delivered strong growth of ~15% YoY and EBIT margin of 6.5% (+50bp YoY) in 9MFY24, owing to the retention and expansion of business with existing clients and new business acquisitions. The management remains confident of clocking a double-digit growth rate in the supply chain business in FY24 and beyond.
- TCI Supply chain operates with a strong asset base, including ownership and lease of modern warehouse facilities totaling 14m sq. ft. Additionally, the company has a customized fleet of over 1,200 trucks and trailers, stainless steel tank containers, 650 ISO containers, and other physical assets.

Below est.; revenue growth weak mainly due to subdued OEM volumes

- Gross margin expanded 220bp YoY (+100bp QoQ) to 42.3% (vs. est. 41%) due to softening commodity costs.
- Other expenses were higher (+210bp YoY/ QoQ as a % of sales) on account of EPR-related provision (more details post-concall tomorrow).
- EBITDA grew 6% YoY to ~INR3.9b (vs. est. INR4.3b).
- There were exceptional items of INR582m pertaining to prior-year EPR expenses, VRS, and restructuring costs.
- Adj. PAT grew 8% YoY to INR1.5b (vs. est. of INR1.6b).
- FY24 revenue/EBITDA/adj. PAT grew 6%/70%/2.3x YoY.
- FY24 FCF stood at INR8.5b (vs. INR3.3b in FY23) led by better operating cash flows of INR17.2b (vs. INR12.1b in FY23) and capex of INR8.7b similar to last year levels.
- Debt declined to INR16.3b as of Mar'24 (vs. INR17.3b as of Dec'23, and INR20.9b in Mar'23) due to healthy cash generation of INR1b and reduction in WC. Capex during the quarter stood at INR2.6b.
- The Board declared a final dividend of INR30/share (vs. INR12/share in FY23).
- Mr. Arnab Banerjee, MD & CEO, CEAT Limited, said, "The company ended the year on a positive note, we saw recovery in volumes in the second half of the quarter in replacement and international markets with stable margins for the quarter and significant improvement in the margins on full year basis and expect the positive momentum in Q1FY25. We have achieved commendable growth, largely attributable to share gain in passenger categories both in 2W and 4W and substantial expansion within the export segment. Overall, our profits & margins grew significantly during the year. The operating margins for the quarter includes additional provision made towards Extended Producers Responsibility (EPR) related requirement imposed on Tyre Industry by the Government of India."
- Mr. Kumar Subbiah, CFO of CEAT Limited, said, "As part of our continuous effort to bring efficiencies in cashflow, it has helped us reduce our consolidated gross debt by approximately INR100 crores in the quarter, supported by improved operational performance. The actual overall capex for the year was close to approx. INR860 crores in line with our plan that we managed to fund through internal accruals. It has been a gratifying year overall, marked by positive free cash flow, significant reduction in debt, improvement in operating margins and the maintenance of healthy balance sheet leverage ratios."
- **Valuation & view:** The stock trades at 14x/12x FY25E/FY26E EPS.
