Tata Global Bull Call Spread: Buy Tata Global June 160 Call at ₹ 3.4-3.8 and sell Tata Global June 170 Call at ₹ 1.0-1.3. Target: ₹ 170, Time Frame: Till June expiry

- Tata Global has been absorbing the intermediate selling and recovering on the back of short closures. The stock saw 10% lower short rollover from the last series
- Since October, 2017, ₹ 155 has acted as a major resistance for Tata Global. During this week, this level was taken out. Looking at the short closure trend in future and Call options, the stock is likely to see good upsides from current levels
- Looking at the Tata Global–Nifty IV spread, the current reading of 19 is near the 20 DMA level of 22. With good OTM Call buying in strikes of 160 and 170, the IV spread is likely to move towards mean + sigma levels of 25. This spurt in volatility is likely to bode well for the strategy as near the money Call option is bought. To hedge the trade, we have recommended selling 170 Call , as we are approaching the penultimate week to June expiry

(Tata Global - Nifty) IV spread: Support near mean -2 Sigma

Portfolio allocation in Derivatives Products...

- It is recommended to spread out the trading corpus in a proportionate manner between the various derivatives research products
- Please avoid allocating the entire trading corpus to a single stock or a single product segment
- Within each product segment, it is advisable to allocate equal amount to each recommendation.
- For example: The 'Daily Derivatives' product carries two intraday recommendations. It is advisable to allocate equal amount to each recommendation
- Quant Picks recommendations should be considered in cash segment and stop loss on closing basis. Time frame for these recommendations is 3 month.
