

### TECHNICALS

#### MARKET OUTLOOK

**NIFTY (8567)** CNX Nifty opened in an upbeat mood with a gap up of around 30 points and witnessed buying interest at every decline. It gave highest daily close of last eight trading sessions and closed the day with the gains of 50 points. It has been making higher highs from last four trading sessions and holding above its 200 DMA. Now, it has to hold above 8560 zones to head towards 8600 and 8635-8650 zones. However, if it fails to hold 8520 zones then weakness may be seen towards next support of 8480 and 8440 levels. Traders are required to be cautious at higher levels as index is heading towards its crucial hurdle of 8650 zones.

#### CNX NIFTY

#### COMMENTS

**SENSEX (28223)** BSE Sensex opened positive and traded in a pleasant mood as every decline was bought throughout the day. It has been making higher highs from last four trading sessions and managed to close above its 28200 levels after eight trading sessions with the gains of around 150 points. Now, the index needs to hold above 28200 levels for the bulls to take the index towards 28500 levels. However if it fails to hold its 28000 levels then bears may drag the index towards 27750 and 27500 levels.

### TECHNICAL CALLS

#### RALLIS: Rs. 230

**EXECUTION PRICE RANGE**  
Buy Between Rs. 224 To Rs. 226

**STOP LOSS**  
219.00

**TARGET**  
237.00

RALLIS has negated the negative trend of last 14 trading sessions with rising trading volumes and closed above its 13 EMA. It had recently corrected sharply from 273 to 212 levels. It witnessed support base buying interest at multiple supports of 212-215 levels. It is showing the early sign of trend reversal and also looks attractive in terms of risk reward ratio. We are recommending to buy the stock with the stop loss of 219 levels for the upside target of 237 levels.

#### SUNPHARMA: Rs. 842

**EXECUTION PRICE RANGE**  
Buy Between Rs. 826 To Rs. 834

**STOP LOSS**  
812.00

**TARGET**  
866.00

SUNPHARMA crossed and closed above the immediate hurdle of 840 levels. It had corrected by 17% from 953 to 795 levels and after that was stuck in a consolidation in the month of July. It has recently taken multiple support at 805-810 levels and is now showing the potential to move towards 866 and higher levels. We are recommending to buy the stock with the stop loss of 812 levels for the upside target of 866 levels.

## HOW TO TRADE USING THE TRENDER+

## CLOSING PRICES

Closing price is the price at which scrip closes on the date mentioned in the report. Traders may initiate their intraday trade on this level. The stock or index should sustain above or below the pivot else you should exit the trade.

## TREND

Trend is the level at which the tendency of stocks can be identified. For best results, you can use the 'trender' to trade. A 'weak' trend denoted by "DOWN" means that traders can trade with a negative bias. If the trend is 'strong', denoted by "UP", one can trade with a positive bias on the long side. Base price should be the pivot point price.

## IF THE TREND IS UP

Ideally, for a buy position, buy at the pivot point and use S1 as the stop loss for a target of levels around R2 and higher.

## IF THE TREND IS DOWN

Ideally, for a sell position, sell at the pivot point and use R1 as a stop loss and S2 or lower levels as a target level.

TRENDER + : This is a broad based technical trend of the stock prevalent, may or may not be necessarily for the day.

DAILY PROJECTED RANGE : Projected Daily high and low are indicative range for the day, if the price moves out of the range the trend in that side may accelerate and turn bullish or bearish.

THE TREND AND THE DAILY PROJECTED RANGE IS BASED ON CERTAIN SIMPLE CALCULATIONS WHICH IS PROVIDED BY BLOOMBERG, EXCLUSIVELY USED BY ANAND RATHI
