

Market Cues

Indian markets are likely to open on a negative note after witnessing some profit taking in the previous trading session. Negative SGX Nifty also indicates trend for the day could be negative.

The US markets remained in a narrow range for the day and finally closed on a negative note. While a drop in crude oil prices generated some negative sentiment, general profit taking pulled the indices down for the day. It seems traders were not reluctant to take big positions ahead of the monthly job data to be published this Friday.

European markets also remained lackluster on Wednesday but ended the day with marginal gain. Indian markets remained volatile during Wednesday and closed on a weak note. We believe further direction of the Indian markets will be decided by the states assembly elections.

News Analysis

US FDA issues 13 observations to Dr Reddy's

In a set back Dr Reddy's has been issued 13 observations by US FDA for its Duvvada oncology formulation facility. The US FDA inspected the oncology formulation facility called Unit-7, located in Visakhapatnam at Duvvaada. The site manufactures cytotoxic and hormonal injectable and is an important plant given Dr Reddy's focus on complex generic filling. Since the US contributes nearly half of the company's sales this could hit the incremental business impacting the near term profitability. At the CMP the stock trades at 21.8x its FY18E EPS and 2.4x EV/Sales. We maintain our NEUTRAL rating on the stock.
