

Market Cues

Indian markets are likely to open flat tracking global indices and SGX Nifty.

U.S. stocks closed marginally higher Monday after the Dow and the S&P 500 posted their first weekly drops in two months last week. The recent weaknesses in indices are largely owing to worries about delays in much-anticipated corporate tax cuts out of Washington. While GE skidded 7.2% after conglomerate plans to cut its dividend by half. The Dow DJIA rose 0.07% to close at 23,440 and the S&P 500 climbed 0.1% to finish at 2,584. The NASDAQ gained 0.1% to end at 6,758.

The U.K. indices finished slightly lower on Monday, though their drop was limited by the pound's fall, which came after reports that British Prime Minister Theresa May is facing pressure to resign. The FTSE 100 fell 0.2% to close at 7415.

On domestic front, shares declined sharply in Monday, as global cues were mixed, industrial output data reports sluggish number and earnings updates from the likes of Adani Ports, DLF, Idea Cellular, BPCL and Coal India weighing on markets. Investors also awaited consumer and wholesale price inflation data this week for clues to the trajectory of food inflation in the months ahead. The benchmark BSE Sensex fell by 0.84% to end at 33,034, while the broader Nifty index dropped 0.94% to close at 10,225.

CPI inflation comes in higher than expected at 3.58%

The CPI inflation, a measure of retail inflation, for the month of October 2017 came in at 3.58%, nearly 30 basis points higher than the September levels. Food inflation went up sharply to 1.90% in October from 1.25% in September and was the big trigger for the rise in overall inflation. Interestingly, urban inflation for October is nearly 45 basis points higher than rural inflation; a reversal of the trend of the last couple of years. While pulses continued to deflate at -23%, the big boost to food inflation came from vegetables which turned sharply higher at 7.47% due to substantial wastage and crop damage. Inflation in fruits and milk also remained elevated.

While the rise in CPI inflation was largely due to the food inflation factor, higher crude oil prices have also had a downstream effect. That brings us to the core question of how will the RBI react to this inflation number when it meets for its monetary policy review on December 06th. Firstly, the CPI inflation is still well within the RBI comfort zone of 4%. Secondly, the GST Council has drastically cut the GST rates on 75% of the items in the 28% GST bracket and that is likely to have a subduing effect on retail inflation in the coming months. However, the RBI rate decision may still predicate on the Fed trajectory.
