

## Market Cues

Indian markets are likely to open flat tracking the SGX Nifty and Global markets.

After a sharp fall the day before the US markets saw some rebound on Thursday as bargain buying helped in strength in the index. Though there were still some volatility in the markets and most of the indices opened on a nervous note, major averages ended the day firmly in positive territory. It seems traders may have felt yesterday's sell off was overdone. The rebound in the US markets also came following the release of some upbeat economic data, including a report from the Labor Department showing another unexpected drop in initial jobless claims in the week ended May 13th.

The European markets declined in the early trades during the day but subsequently recovered on the back of positive cues from the Wall Street and ended with minor losses for the day.

Indian markets witnessed sharp selling on Thursday amid pressure in the Global markets. The uncertainty surrounding U.S President Donald Trump after firing of FBI Director raised concern among investors since then we have seen high volatility in the major global indices and the trend might continue for some time. Back home, the GST council has approved and passed the various tax rates to applicable for sector and since 81% of the goods are likely to be taxed at 18% or below has come as a comfort and markets might take it in a positive note.

## News Analysis

### GST Council sets rates for goods & services tax to be implemented from 1<sup>st</sup> July

The path for roll out of the Goods and Services Tax (GST) from July 1, 2017 has become smoother now with the GST council clearing the tax rates. Accordingly all services will be taxed at 12% and 18% while goods will be taxed at five different slabs of 5%, 12%, 18%, 28% and 28% plus.

While earlier there was an apprehension that in the initial years the implementation of GST will be inflationary, the Finance Minister has said that impact of GST will not be inflationary, rather in some instance prices are likely to drop. The fact that several daily use items such as milk, fruits, vegetables and cereals & food grains will be exempted from all tax makes us believe that in fact inflation may not be an issue post implementation of GST. During the meeting tariff on about 1211 items were finalized and it was decided that nearly 81% of the items will fall under the 18% GST slab and only 19% of the goods to be taxed above 18% rate. Giving a boost to the heavy capex related industry the council has set the rate for capital goods, industrial intermediate items at 18%. Further in another key development it has been said that Coal will be taxed at 5% against the current rate of 11.69%, this should not only help the power producers which are reeling under pressure, but also to host of industry which are dependent on it either in the form of supplying goods or services. Luxury cars will attract a rate of 28%, plus 15% cess, while small petrol cars will attract 28% tax in addition to 1% cess. Diesel small cars will carry a tax of 28% along with 3% cess. However, there are some sectors like consumer durables which will attract a lower tax rate of 28% compared to existing 28%, benefiting both the industry and end users.

### Bank of Baroda posts improved set of results for 4QFY17

BoB has come out with a good set of results for the quarter. While the reported PAT numbers have been below our expectations, there is an improvement of NPAs which is a positive development. GNPs have come down to 10.46% vs 11.40% while NNPs have come down to 4.72% vs 5.43%. During the quarter the bank has taken higher provisions QoQ, but there has been an improvement in the PCR also from 64.5% to 66.8% and this should take in a positive note. Slippages of ₹4,077 cr remained under control and this is directionally positive for the improvement in the asset quality for the bank. Standard restructured loan book has fallen to ₹10,785cr vs ₹14,059cr. Overall business growth continues to be sluggish for the bank with loan book remaining flat YoY. However, on QoQ basis the loan book has grown by 9.5%. The bank continued to downsize its overseas loan book, while the domestic loan book saw decent growth during the quarter. **However, we have a cautious call on the PSU space and NEUTRAL rating on the stock.**
