Market Review 1.11.17

Nifty (10335) we said, technically now I expect a big day...either up or down...if upside then the next technical target is 10486 otherwise the crucial support to watch would be 10344' the Nifty opened in the green and traded down to close in the red and closing below the 10344...technically now 10385 becomes a stiff resistance and downside to 10240 is a possibility...

The crucial support for the Nifty is at 10240-10180 and the resistance is at 10385
