## Market Review 5.9.17

**Nifty (9913)** we said, 'technically now 10005-10050 is a possibility as long as 9840 holds' the Nifty opened in the green and started trading in the red to close in the red due to North Korea Hydrogen Bomb detonation...technically the bar generated for the day is a bearish bar and some more downside is not ruled out...there is a stiff resistance at 10005 and crucial support still exists at 9840

The crucial support for the Nifty is at 9840 and the resistance is at 10005-10050
