Market Review 5.10.17

Nifty (9915) we said, we have a credit policy and the session is expected to be volatile and the target zone still is 9946' the Nifty unfolded volatile as expected and climbed up to our target zone and has closed in the green...technically the Nifty is in a pause mode on higher time frame and achieved its target of 9446...technically now it's Make or Break setup... and if it closes above 9946 then the technical targets in the days to come would be 10001-10043-10080...crucial level to watch would be 9850

The crucial support for the Nifty is at 9850 and the resistance is at 9946-10041-10080
