Today's top research ideas

Bharat Financial Inclusion: Collections still away from normalcy Cut estimates by 9% for FY18; Upside limited

- Collection efficiency has been improving with a time lag, but remains significantly below pre-demonetization levels. Management has alluded to recovery over 3-4 months.
- Considering a) INR3b+ overdue in 60dpd+ b) higher share of managed portfolio (collection efficiency at ~88%) in Maharashtra and c) securitized portfolio collection efficiency at 94%, we sharply increase credit cost estimates to factor in higher write-offs. We now factor in provision charge of INR2.6b over 4QFY17-FY18 v/s INR1.2b earlier.
- We continue liking the long-term prospects of BHAFIN, but cut FY18 EPS estimates by 9% to factor in higher credit costs and interest reversals. However the recent run-up in the stock price, offers limited upside. Downgrade to Neutral.

IEA warns of oil 'supply crunch' by 2020 with no capex Global oil supply may struggle to match demand after 2020, when the pinch of a two-year decline in investment in new production could leave spare capacity at a 14year low and send prices sharply higher, the International Energy Agency (IEA) said on Monday. Investors generally are not betting on a sharp rise in the price of crude oil any time soon, but the contraction in global spending in 2015 and 2016 and growing global demand means the world could well face a "supply crunch" if new projects are not soon given the go-ahead, the IEA said in its fiveyear "Oil 2017" market analysis and forecast report.

Downgrade to Neutral

Collections still away from normalcy

Cut estimates by 9% for FY18; Upside limited

- Collection efficiency has been improving with a time lag, but remains significantly below pre-demonetization levels. Management has alluded to recovery over 3-4 months.
- We factor in higher credit costs for FY17/18 on the back of an increase in NPLs to INR3b+ as well as lower collection efficiency in off-BS portfolios.
- While we continue liking the long-term prospects of the company, we believe the EPS cut, coupled with the recent run-up in the stock price, offers limited upside. Downgrade to Neutral.

Collection efficiency improving, but still not there yet

The company has been able to collect monthly dues with a lag. However, the rate of collection of overdues declines after one month. While collection efficiency of November (2016) dues was 91% in November, it increased by 580bp to 96.8% in December and further by only 110bp and 30bp in January and February, respectively. Collection rate (defined as collections in period/dues for that period) has improved over past four months, but still stood at only 95.5% in February. This means that 4.5% of dues are still not being paid on time, despite the currency circulation having improved a lot.

Credit cost spike likely

Management commented that recoveries will take another 3-4 months to normalize. Considering a) INR3b+ overdue in 60dpd+ b) higher share of managed portfolio (collection efficiency at ~88%) in Maharashtra and c) securitized portfolio collection efficiency at 94%, we sharply increase credit cost estimates to factor in higher write-offs. We now factor in provision charge of INR2.6b over 4QFY17-FY18 v/s INR1.2b earlier. Our back of the envelope calculation suggests on-time collection efficiency of ~84%.

Demand still intact; AUM guidance marginally increased

On account of pent-up demand, growth picked up impressively in January and February. Disbursements in February (INR13.6b) have exceeded those in October (INR11.9b). Management has increased FY17 AUM guidance from INR85b earlier to INR90b now, and reiterated 50% AUM growth for FY18. We have increased AUM assumption by 4% for FY17.

The worst is behind, but upside limited – Downgrade to Neutral

We continue liking the long-term prospects of BHAFIN, but cut FY18 EPS estimates by 9% to factor in higher credit costs and interest reversals. The recent run-up and cut in estimates present limited upside from current levels. Downgrade to **Neutral** with TP of INR848 **(3x FY19 BVPS).**

Multiple growth drivers ahead; downside risk limited

Product concentration risk lowest amongst peers: Aurobindo Pharma (ARBP) recorded ~7% QoQ decline (down ~13% YoY) in the US base business for 3Q, leading to concerns about the US business growth outlook. We believe this a one-off event as the company faces least product concentration risk among peers. No single product for ARBP contributes more than 3% of sales (unlike SUNP, LPC and DRRD where the top three products account for >20-25% of sales). Also, no single ANDA has any meaningful disproportionate contribution to margins as ARBP has a matured product basket, with all of its ~190 launched ANDAs facing competition from multiple players (typically 4-5 or more).

Commissioning of key plants to drive volume growth in FY18/19E: Over next 6-9 months, three key formulation plants are getting commissioned, including Vizag (dedicated supply to EU), Unit XVI (antibiotic injectable plant to supply products in the US) and Naidupet (oral solids plant to supply to the US). Supplies from the Vizag plant to Europe will start from Mar-17. This will have a two-pronged impact: 1) capacity at Unit VII and Unit III will get released (which are primarily used for supply to the US and are running at capacity utilization of ~80%) and 2) European business margins should expand (to ~7-8% in FY18E from ~5% currently) as the company plans to manufacture 50% of its products sold in EU at this plant. Naidupet plant will get commissioned by mid-FY18 and will be one of the largest formulation plants for ARBP (capacity of 7-8b tablets). Strong launch pipeline coupled with volume push to drive growth: ARBP received 49 and 47 ANDA approvals in FY16 and 9MFY17, respectively (highest in the industry). We expect this strong approval and launch momentum to continue on the back of ~159 pending ANDAs. We expect ARBP to deliver midteens growth in the US, led by its strong launch pipeline in injectables (~40 pending ANDAs), steady mid-teens growth in Natrol and huge capacity expansion in orals and injectables (which will lead to volume push in existing and new products). We expect US sales to pick up over the coming quarters, led by key launches like Epzicom, Meropenem. Tenofovir, Toprol XL and Fortamet Solu-Medrol. Apart from this, ARBP has an approved pipeline of ~50 products (~13 OTCs, 5-6 OTCs, 6 injectables, rest orals including Vancomycin) which will be launched by 2QFY18.

EU and ARV business can surprise positively in FY18/19: The manufacturing of ~60 products has been shifted to India (to Unit VII & III). Given that supply from Vizag to EU markets will start from Mar-17, the company plans to shift manufacturing of ~114 products from Vizag (sales value of >USD200m) over next 12-18 months. This will lead to significant cost savings. We expect EBITDA margin of this business to expand from ~5% to ~7-8% in FY18E and low-double-digits in FY19E. ARV business growth in FY19 will be driven by the pick-up of DTG triple combination approval (USD500m market).

Strong earnings growth trajectory, improving cash flow to drive valuations: At its CMP, ARBP trades at 14x FY18E, at >20% discount to its peers. The valuation gap is expected to narrow down on account of the company's increasing profitability, strong earnings growth trajectory (17% CAGR till FY19E) and improving free cash flow. ARBP remains one of our top picks in the sector with a target price of INR915 @ 18x 1HFY19E PER (v/s INR1050 @ 20x 1HFY19E earlier). We cut EPS by 2-3% and target multiple by 10% as we build in the impact of regulatory uncertainty in the US.

US business – strong growth to sustain

US business to record mid-teens CAGR

Over FY11-16, ARBP delivered robust >50% CAGR, driven by niche oral launches (including Cymbalta) and entry into injectables, controlled substances and government tender business. Despite strong growth over the last five years, we believe ARBP is well poised to outpace peers in the coming years. We expect ARBP to deliver mid-teens growth in the US on the back of a strong launch pipeline in injectables (~40 pending ANDAs), steady mid-teens growth in Natrol and huge capacity expansion in orals and injectables (which will lead to volume push in existing and new products). We expect a pick-up in US sales over the coming quarters led by key launches, including Epzicom, Meropenem, Tenofovir, Toprol XL and Fortamet, Solu-Medrol. Apart from this, ARBP has an approved pipeline of ~50 products (~13 OTCs, 5-6 OTCs, 6 injectables, rest orals including Vancomycin), which are expected to be launched in 2QFY18.

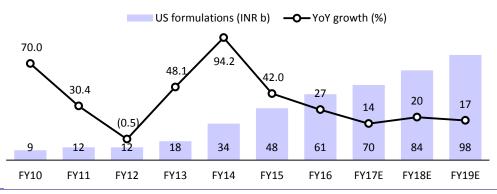

Exhibit 4: US business to grow at ~14%YoY

Burst of approvals provides strong visibility of future growth

ARBP received 49 and 47 ANDA approvals in FY16 and 9MFY17, respectively (highest in the industry). The approvals are a mix of plain vanilla generics, limited competition injectables and complex oral generics. Out of the pending injectables portfolio of ~40 ANDAs, most were filed 12-24 months back. We thus expect multiple injectables approvals to come through over the next two years.

Base orders to drive order inflow in 4QFY17

Domestic execution pick-up likely in FY18

We recently met Larsen and Toubro's (LT) management. Key takeaways: Base orders to drive order inflow in 4QFY17, large orders pick up in FY18

- Large orders in Defense (ex 'Vajra' artillery guns: INR45b), Infrastructure (Trans-harbor link, Coastal road, Shivaji statue, Mumbai metro), Hydrocarbons (BS VI upgrades, Refinery expansions) are likely to slip to FY18. This, however, was factored in order inflow growth guidance cut (to +10% for FY17 v/s +15% earlier) in 3QFY17.
- The company is on track to its meet order inflow growth guidance of 10% to INR1.5t for FY17 (this implies 25% YoY growth to INR544b in 4QFY17). LT was L1 in INR300b of orders as of January 2017.
- Order growth in 4QFY17 would be largely driven by base orders in Infrastructure, which includes Water, T&D and Transport Infrastructure.
- Power: It booked order for NLC Ghatampur (INR20b, 1,980MW) in 2QFY17, and sees a robust pipeline of ~8GW in FY18. However, after being strong in FY15 (INR150b), power inflows stood at ~INR30-40b in FY16/FY17. This would impact revenues in FY18-19 unless inflows pick up meaningfully.
- Hydrocarbon: Overseas orders were on track, while domestic ordering is likely to pick up from FY18, driven by a) BS VI upgrades and b) brownfield/greenfield capacity expansion by refineries. It won INR67b Saudi Aramco orders in 2QFY17; another large USD1b refinery order for Saudi Aramco was lost to Technicas.
- Infrastructure: Order growth of 25% in 4QFY17 would be driven by base orders in Infrastructure, primarily from the Water, T&D and Transport Infrastructure segments. Building & Factories (average ordering ~INR200b annually) has seen some slowdown in ordering post demonetization.

Domestic execution pick-up likely in FY18; overseas on track

- Domestic E&C execution was weak in 3QFY17 (+1% YoY, +5% YTD in 9MFY17), impacted by a) demonetization (30% of workforce left for native towns/villages), b) delays in getting clearances and c) payment delays by customers. However, the impact of demonetization has subsided, and 4QFY17 is back to normal. Domestic execution is expected to pick up from FY18.
- Overseas execution is on track (+16% YoY in 9MFY17) for large metros (Doha, Qatar) and road projects. Payments are also coming on time.

Non-core assets sale on track

- Kattupalli port: It is being sold to Adani Ports on a debt-free basis, with a consideration of INR14.3b already received in 3QFY17. The deal is likely to conclude in 4QFY17/1QFY18 after TIDCO approval and SEZ clearances are received. It had invested INR40b in the yard-cum-port, of which INR18b were for the port. The proceeds from the sale will be used to pay off debt associated with the port. The port had incurred losses of INR2b in FY16, which, however, has come down in FY17 after Adani took over the O&M.
- Road assets: LT is incurring ~INR6b of losses in this. It thus aims to divest the assets and is in talks with potential buyers, including CPP.
- LT Valves: The company has called an EGM to approve the demerger of this unit. It is also looking to sell other non-core businesses.
- Nabha Power: The sale of this unit is likely to happen in FY18 after the decision on the appeal in the SC (APTEL ruling against L&T) is made; booked INR1b of provision on receivables in 3QFY17.
- Seawoods Mall: Since sale proceeds are lower than the investment, it booked INR2.7b provision in 3QFY17. The actual sale is yet to be booked and cash still to be received.

Manufacturing Assets

- Nuclear forgings shop: INR2.5b losses to continue in near future. It was expecting an order to be placed by NPCIL, but given the issues with Westinghouse, orders are unlikely to be placed anytime soon.
- Kattupalli yard: INR4b losses annually; will improve with defense orders coming through from FY18.
- BTG JV with MHI: After being strong in FY15 (INR150b), power inflows dropped to ~INR30-40b. This would impact revenues in FY18-19 unless inflows pick up meaningfully. It will continue to be profitable at PAT level.
- Hazira yard is gradually being tapered down, with orders shifting to the Katupalli yard; has order for 30 interceptor boats to be completed.

Valuation and view

LT is exposed to several levers across its business/geographical segments. It has emerged as the E&C partner of choice in India, which provides it with a robust platform to capitalize on the next leg of investment cycle. We maintain **Buy** with an SOTP-based price target price of INR1,660 (E&C business at 18x FY19E). We assign 18x multiple to the standalone business.

Indian Pay-TV ecosystem set for an overhaul

Big broadcasters well-endowed to protect revenue turf; distribution platforms' reliance on pay channel subscription to reduce

Our view – winners and losers

We maintain estimates across our media coverage universe, given the uncertainly around the tariff order implementation. We believe major broadcasters like Zee and Star are relatively insulated from the reach-subscription equation, given their strong distribution across India. Assured monthly rental will hold both DTH players and MSOs in good stead, as it will reduce their dependence on subscription income. However, the fate of MSOs could hinge on the MSO-LCO revenue share squabble in the new regime. Even if an average Indian household (staple content consumption spanning GECs, movies, regional, sports, news and English genres) subscribes to around 15 driver channels on an a la carte price, the network capacity fee + pay channel price for the 15 channels would drive the consumer bill to INR250+. Value-seekers/low-end subscribers would end up paying more/same for less. However, premium subscribers and distributors – to package channels in a way that the subscription pool is protected.

15% discount cap on bouquet pricing retained; genre-wise price caps abolished

- The TRAI, in its final tariff order on content pricing, has retained the 15% discount cap on bouquet pricing v/s 80-90% bouquet discounts prevailing today. Historically, given their larger reliance on ad revenues, broadcasters were incentivized to bundle their flanking channels with their anchor channel and offer an over-subsidized bouquet of channels. Piggybacking on the anchor channel's reach ensured increased ad monetization for the flanking channels too.
- The abolishment of genre-wise price caps is expected to give some flexibility to broadcasters in channel pricing (only restriction: channels forming part of a bouquet cannot have an a la carte MRP >INR19/sub/month) and insulate subscription revenue (~one-third of broadcasters' revenue). Advertisement revenues from flanking/niche channels could be impacted negatively as their reach takes a beating post the implementation of the 15% discount cap on bouquets. Bouquet discount + distribution fee (20% of MRP) cannot exceed 35% of the maximum retail price (MRP) of channels.

Impact of higher retail price-led reduced reach on advertisement revenue overplayed

Our interactions with media agencies indicate that an estimated ~2,000 GRPs/week is typically budgeted for the Hindi GEC category (33% viewership share across categories). Even if higher retail prices for driver pay channels lead to a reduction in reach, GECs will continue to be the preferred vehicle to get the maximum and cheapest reach for advertisers. Hence, TV ad budgets are unlikely to move dramatically, implying that cost per reach could go up for the driver channels.

Carriage and placement regulated; latter's significance expected to decline as bouquet size reduces

- While the draft order proposed to regulate carriage fees charged by distribution platforms to broadcasters for carrying their channels, the final order also regulates placement and marketing fees. The carriage fee has been capped to 20 paise per channel per set-top box (for HD channels, the cap is 40 paise per channel per HD set-top box).
- Carriage fee slabs per channel per subscriber for channels with subscription:
 - 1) <5% of the active subscriber base = INR0.2/sub/channel/month,
 - 2) 5%-9% of active subscriber base = INR0.15/sub/channel/month,
 - 3) 10%-14% of active subscriber base = INR0.1/sub/channel/month,
 - 4) 15-20% of active subscriber base = INR0.5/sub/channel/month.
- Channels with viewership of >20% of the active sub base of a distribution platform are exempted from paying any carriage fee. Discounts on carriage fees by DPOs have been capped at 35% of the carriage rate.
- Placement and marketing discount too has been capped to 15% of allocation toward placement.

Network-related rental income and subscription income decoupled

TRAI retains the clause of de-coupling of network-related rental and subscription income

Consumers will have to pay: (i) network capacity fee for subscribing to the distribution platform's network capacity and (ii) subscription fee toward the channels/bouquet they purchase. The consumer would pay maximum network capacity fee of INR130/month (ex-taxes) for the first 100 SD channels subscribed (1 HD channel = 2 SD channels), and for every additional slab of 25 SD channels, consumers would have to fork out INR20/month. Subscribers shall be free to choose pay channels, FTA channels or bouquet of channels within the capacity slabs, other than the mandatory DD channels.

Placement and marketing fee discount capped at 15%

Broadcasters can pay placement fee to distributors for securing a preferable position for its channel within applicable genre and can also carry out marketing of its channels. However, both these dealings have to be transparent, reported in interconnection agreements and permitted within the limit of 15% discount cap (max. permissible limit). This could perhaps be used as a back-door push for inclusion of channels in the first batch of 100 SD channel bouquet for broadcasters, and could also aid distribution platforms in tapping scale-led benefits. Dish TV Videocon could be a reckoner.

Large broadcasters well-endowed to manage reach-subscription equation; DTH could gain marginally; could go either way for the MSOs:

Zee Entertainment: Zee has ~35 channels in its bouquet and a strong presence across genres of relevance (Hindi GEC, movies, regional portfolio). Assuming average consumer-level ARPU of ~INR250/sub/month remains unaltered, Zee stands to gain more subscription with the implementation of the regulation (assuming Zee enjoys ~18-20% of the broadcasters' subscription ARPU in the new regime). Any impact on ad monetization from flanking channels is expected to be well managed by increasing driver channel pricing and reducing non-driver channel pricing.

DTH's carriage could see a leg-up; profitability-wise, neutral-to-marginally positive for distribution platforms

- Dish TV: Dish TV's average net ARPU is ~INR160. Even if Dish TV chooses to charge INR100 (<max cap of INR130/sub/month) as network capacity fee, it would still manage to increase its EBITDA/subscriber/month from INR59/sub/month to INR65/sub/month. Dish TV's carriage revenue of ~INR1b has significant scope for an increment, especially after the Dish TV-Videocon merger, which is expected to close by end-FY19. The same applies for MSOs.</p>
- MSOs: MSOs' fate to some extent also hinges on the MSO-LCO share. If LCOs insist on retaining 55% share instead of the Standard Interconnection Agreement (SIA)-stipulated 45%, improvement in MSOs' profitability could be lower than potential.

#Assumed network capacity fee @ INR100/sub/month ##FY17E figures

Distributors (MSOs/DTH/IPTV/HITS)	Interconnection	RIO	Carriage Fees
Distributor to act as collection agent and related fees restricted to 20%.	No broadcaster/distributor can engage in exclusive contracts	Every broadcaster shall offer all television channel(s) on a-la-carte basis to distributor of television channels. Broadcasters can offer its pay channels in form of bouquet(s) as well.	The rate of carriage fee per standard definition channel per subscriber per month declared by the distributor shall not exceed twenty paisa and for high definition channel per subscriber per month shall not exceed forty paisa
Can charge a maximum of INR130 (ex- taxes) per sub per month as network capacity fee for a capacity of 100 SD channels (One HD channel = 2 SD channel for computation)	No service provider shall propose for payment of a minimum guarantee amount by other service provider for providing signals of television channels or access to the network	Distribution fee from broadcaster to distributor capped at 20%	Once the penetration of a channel in its relevant market reaches between 5-10%, carriage fee has to be reduced by 25% from the initial amount; for 10-15% it has be reduced by 50% and for 15-20% it has to be reduced by 75%. Broadcasters do not have to pay any carriage fee for those channels whose penetration is more than 20% in their relevant market.
Each additional 25 channel slab can be purchased at INR20/sub/month	MSOs and LCOs shall enter into a model interconnection agreement by mutually agreeing on deliverables	Broadcaster cannot offer more than 15% discount on its bouquet pricing viz-a- viz a la carte pricing	
Distribution platforms can form bouquets provided bouquet price > or = sum of individual channels of that bouquet	In the event of failure in arriving at an MIA, MSOs and LCOs shall settle disputes/charges under SIA wherein the MSO:LCO share of the network capacity fee + distribution fee shall be split in the ratio of 55:45		
All broadcasters' bouquet need to be offered by distributors			
No additional charge apart from network capacity fee can be charged for FTA channel subscription			

Exhibit 7: Snapshot of key provisions of TRAI's new interconnection framework:

1. Bosch: Readying Rs 800-Cr annual capex for india for next few years; Soumitra Bhattacharya, MD

- Looking to invest Rs 800 crore annually over the next few years in a bid to develop the Bengaluru facility into a modern technology park and to move out the manufacturing operation to a new location.
- Have been investing between Rs 650 crore to Rs 900 crore annually over the past 5 years; this investment pattern is likely to continue subject to business conditions.
- With the first phase already complete, looking at 2019 to complete the second phase as well.
- On the cusp of growth; expecting it to be a steady growth, and not spectacular. Want to maintain our growth and improve on it; expecting double digit growth rate going forward.

2. Honeywell india: Looking to tap mid-market segment; Vikas Chadha, President

- Looking to create more products for the urban and mid-market segment as we expand our customer base in the country.
- The company plans products that would primarily be de-frilled and scaled down versions of the existing portfolio.
- Have participated in a few smart city initiatives which would continue to play out over the next few years.
- India is among the faster growing markets for the company globally, and at scale, as a result it is getting the due attention and investments from the parent company.

1. Parachuting into trouble. by Mythili Bhusnurmath

GDP numbers released by the Central Statistical Organi sation in end-February have reignited the debate over whether the economy has got over the demonetisation shock.But one thing is quite clear: the economy is growing well below potential. So what can we do to ensure the economy realises its potential? The Economic Survey's suggestion is simple.Get non-performing assets (NPAs) off bank balance-sheets and, hey, presto, both bank and corporate balancesheets will look `fair and lovely'. The trend of low and falling private corporate investment, the biggest stumbling block to growth revival, will be reversed.

2. Managing commodity and currency risk. by Ashima Goyal

As oil prices rise towards \$60, how many oil-importing firms are hedged, and have locked in imports at a lower price, thus laying off commodity and currency risk? In the US, for example, South West Airlines outperformed during oil price shocks because of such a hedging strategy. Hedging is often left incomplete, however, for a number of reasons. First, psychological factors undermine rational hedging. People prefer a sure gain, but they also prefer an uncertain outcome with a small probability of gain to a sure loss. In other words, hedging involves a small sure cost, and without it there is a small probability of a large gain.

3. Where hawks rule. by R Balachandran

Many of us would recall from our childhood stories about the legendary King Vikramaditya. He was gifted a fabulous throne by Indra himself. The throne had magical properties that bequeathed great wisdom to those in its vicinity. The throne at the Reserve Bank of India is probably comparable to that of King Vikramaditya's. Whoever sits on it as governor, be he a 'dove' or an 'owl', turns into a hawk instantly so far as fighting inflation goes. Consider the circumstances in which D Subbarao was appointed RBI governor in September 2008. He was nominated by the UPA government when P Chidambaram was finance minister.

4. Budget 2017 confers unfettered powers on taxman at the cost of taxpayers; here's how. by Mukesh Butani

The people of India have decisively voted for a change", was FM Jaitley's opening statement in his maiden Budget speech, in 2014. The 'change' is indeed echoed by his government transforming the economic and tax policies, with the reforms boosting the confidence of domestic and international investors. The government with a massive mandate has had an uphill task to manage expectation of investors and business community and deliver on its promise of providing a non-adversarial tax regime, simplification of tax rules, tax reforms, corruption free economy, improve India's ranking on ease of doing business and the list goes on.

5. Why india must resist binding negotiations with developed nations. by Pralok Gupta

Electronic commerce (e-commerce) is the latest buzz in many international institutions and intergovernmental organisations. Be it at the WTO, G20 or UNCTAD, many countries appear enthusiastic about the need to negotiate multilateral rules to govern international trade through e-commerce. Their enthusiasm appears misplaced. Further, WTO rules on e-commerce may actually hurt the interests of most developing countries. At the WTO, countries have been discussing different facets of e-commerce.

6. Business leaders must learn to listen. by Arun Maira

When Jimmy Carter was president of the US, the shadow of recession was looming on the economy. The president's advisers feared that even the use of the word "recession" while explaining the state of the economy would alarm the bulls, bring out the bears, and deepen recessionary conditions. So, at a press conference the secretary of commerce said that since he could not use "the 'R' word", he would refer to what was happening as "the 'banana' thing". Globalization is going through a "banana" moment. Cheerleaders of globalization have been reluctant to admit that globalization, in the form they celebrated it, is in deep recession already.

International

7. The isolation of angela merkel's germany. by Gideon Rachman

Angela Merkel has described the idea that she is now the de facto leader of the western world as "grotesque" and "absurd". The German chancellor's angst is understandable. Modern Germany has no desire to lead the west and is not powerful enough to bear that burden. But unrealistic expectations are not the only reason for German anxiety. If Ms Merkel looks out from the glass box of the chancellor's office in Berlin there is trouble on every horizon. To the east are the ever more authoritarian and Germanophobic governments of Poland and Hungary.

Disclosures

This document has been prepared by Motilal Oswal Securities Limited (hereinafter referred to as Most) to provide information about the company (ies) and/sector(s), if any, covered in the report and may be distributed by it and/or its affiliated company(ies). This report is for personal information of the selected recipient/s and does not construe to be any investment, legal or taxation advice to you. This research report does not constitute an offer, invitation or inducement to invest in securities or other investments and Motilal Oswal Securities Limited (hereinafter referred as MOSt) is not soliciting any action based upon it. This report is not for public distribution and has been furnished to you solely for your general information and should not be reproduced or redistributed to any other person in any form. This report does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, investors should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur.

MOSt and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group. We and our affiliates have investment banking and other business relationships with a some companies covered by our Research Department. Our research professionals may provide input into our investment banking and other business selection processes. Investors should assume that MOSt and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may educate investors on investments in such business . The research professionals responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and

interpreting information. Our research professionals are paid on twin parameters of performance & profitability of MOSt. MOSt generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, MOSt generally prohibits its analysts and persons reporting to analysts from serving as an officer, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals or affiliates may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoingamong other things, may give rise to real or potential conflicts of interest. MOSt and its affiliated company(ies), their directors and employees and their relatives may; (a) from time to time, have a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analysis(s), as the recommendations made by the analysis(s) are completely independent of the views of the affiliates of MOST, lower though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report Reports based on technical and derivative analysis center on studying charts company's price movement, outstanding positions and trading volume, as opposed to focusing on a company's fundamentals and, as such, may not match with a report on a company's fundamental analysis. In addition MOST has different business segments / Divisions with independent research separated by Chinese walls catering to different set of customers having various objectives, risk profiles, investment horizon, etc, and therefore may at times have different contrary views on stocks sectors and markets.

Unauthorized disclosure, use, dissemination or copying (either whole or partial) of this information, is prohibited. The person accessing this information specifically agrees to exempt MOSt or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOSt or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOSt or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays. The information contained herein is based on publicly available data or other sources believed to be reliable. Any statements contained in this report attributed to a third party represent MOSt's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. This Report is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. While we would endeavor to update the information nerein on reasonable basis, MOSt and/or its affiliates are under no obligation to update the information. Also there may be regulatory, compliance, or other reasons that may prevent MOSt and/or its affiliates from doing so. MOSt or any of its affiliates or employees shall not be in any way responsible and liable for any loss or damage that may arise to tagant person from any inadvertent error in the information contained in this report. MOSt or any of its affiliates or employees do not provide, at any time, any express or implied warranty of any kind, regarding any matter pertaining to this report, including without limitation the implied warranties of merchantability, fitness for a particular purpose, and non-infringement. The recipients of this report should rely on their own investigations.

This report is intended for distribution to institutional investors. Recipients who are not institutional investors should seek advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents

Most and it's associates may have managed or co-managed public offering of securities, may have received compensation for investment banking or merchant banking or brokerage services, may have received any compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company in the past 12 months. Most and it's associates have not received any compensation or other benefits from the subject company or third party in connection with the research report.

Subject Company may have been a client of Most or its associates during twelve months preceding the date of distribution of the research report

MOSI and/or its affiliates and/or employees may have interests/positions, financial or otherwise of over 1 % at the end of the month immediately preceding the date of publication of the research in the securities mentioned in this report. To enhance transparency, MOSt has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report.

Motilal Oswal Securities Limited is registered as a Research Analyst under SEBI (Research Analyst) Regulations, 2014. SEBI Reg. No. INH000000412

Pending Regulatory inspections against Motilal Oswal Securities Limited:

SEBI pursuant to a complaint from client Shri C.R. Mohanraj alleging unauthorized trading, issued a letter dated 29th April 2014 to MOSL notifying appointment of an Adjudicating Officer as per SEBI regulations to hold inquiry and adjudge violation of SEBI Regulations; MOSL replied to the Show Cause Notice whereby SEBI granted us an opportunity of Inspection of Documents. Since all the documents requested by us were not covered we have requested to SEBI vide our letter dated June 23, 2015 to provide pending list of documents for inspection.
