Piping hot news

Exports jump 17.5% to \$24.5 bn in February

▼ Rising for the sixth straight month, exports posted a 17.48 per cent year-on-year hike in February, the highest rate in more than five years. A low base effect and increasing crude oil prices boosted the export of engineering goods and petroleum products, respectively, which in turn aided the growth in exports.

MoM Chg (pp) Chart of the Day: Sector allocation of domestic MFs – Tech, Healthcare and Consumer increased; while Auto, Private Banks, Cement showed signs of moderation

SBI to raise Rs 15,000 cr equity capital next fiscal

State Bank of India (SBI) on Wednesday said its board has approved a proposal that would allow the bank to raise equity capital of up to Rs 15,000 crore in FY18. In January 2014, SBI had raised Rs 8,032 crore with Life Insurance Corporation of India picking up a big chunk of around 41% of the total shares sold. The shares were priced at Rs 151.76 each and the bank had hoped to raise Rs 9,600 crore. The SBI stock ended Wednesday at Rs 277.40, ahead of the late-evening announcement. At this price, the stock — including subsidiaries — trades at 1.2 times price to adjusted book for 2017-18. On a standalone basis, it trades at 1.3 times.

Windfall for wine, beer and film lovers; CM Siddaramaiah cuts VAT on liquor, caps entry fee in multiplexes at Rs 200

Wine lovers and film buffs in Karnataka have much to cheer about after the state government on Wednesday made liquor cheaper in the state, reports fe Bureau in Bengaluru. Chief minister Siddaramaiah proposed removing the value-added tax (VAT) on liquor from April 1 and sought to cap the entry fee in multiplexes at Rs 200 per ticket. The government plans to do away with VAT on liquor, beer, feni and wine. Liquor attracted a 5.5% VAT when consumed along with food in bars and restaurants. However, the government has rationalised the tax structure on 17 slabs under which the liquor is sold....

Annual Report Threadbare

DR REDDY'S LABORATORIES

Strong cash flow growth, earnings remain subdued

Dr. Reddy's Laboratories' (DRRD) FY16 annual report analysis highlights a muted 4% increase in consolidated operating revenue to INR154.7b (FY15: INR148.2b), primarily on account of (a) USFDA warning letter, which has delayed the launch of certain APIs and (b) devaluation of the Russian Rouble, leading to a 29% decline in revenues from Russia to INR10.6b (FY15: INR14.9b). Forex loss in Venezuela, spike in remedial costs to resolve USFDA issues, and high R&D expense (INR17.8b; 12% revenue) led to a decline in PAT to INR20.0b (FY15: INR22.2b). Over FY14-FY16, generics continued to dominate with a share of 83% of total revenue. The share of PSAI has declined owing to USFDA warnings. The cash conversion cycle improved by 11 days to 175 days, primarily on account of an increase in payables by 10 days. This steered an improvement in earnings to cash conversion to 120% (FY15: 82%). Operating cash flows improved to INR37.0b (FY15: INR24.0b).

- Strained EM operations and USFDA issues weigh on revenue: Revenue grew by a mere 4% to INR154.7b (FY15: INR148.2b), primarily on account of (a) USFDA warning letter, which delayed the launch of certain APIs and (b) devaluation of the Rouble, leading to a 29% decline in revenue from Russia.
- High R&D cost and remedial expenses weigh on earnings: The spike in remedial costs to resolve the USFDA issues (SG&A at 30% of revenue) and high R&D expense (12% revenue) led to a decline in PAT to INR20.0b (FY15: INR22.2b). Given the subdued revenue growth trend, the benefits of R&D seem to elude for now.
- venezuela operations cause forex loss of INR5b: The overhaul of Venezuela's currency exchange system led to a foreign exchange loss of INR4.6b on translation of such monetary items, apart from impairment of inventory and fixed assets for INR0.5b. Adjusted for forex gains/losses in Venezuelan operations, PBT improved 9% to INR31.7b (FY15: INR29.0b).
- Robust operating cash flows to fund capex: Improvement in cash conversion cycle to 175 days (FY15: 186 days) have led to an improvement in OCF to INR37b (FY15: INR24b). Over FY12-16, operating cash flows have remained robust, contributing 95% of required funds. While 46% of funds have been utilized for capital expenditure, 29% have been used in the form of cash and investments. Dividend payout utilized 13% of cash.
- Intangibles on a rise: In FY16, DRRD's intangible assets increased 50% to INR24.6b (FY15: INR16.4b), primarily on account of purchase of UCB's select brand portfolio for INR8b.

The ART of annual report analysis

Operating cash flows improve to INR37.0b (FY15: INR24.0b), primarily on improvement in the cash conversion cycle to 175 days (FY15:186 days).

R& D investments remain high at INR18b (12% of revenues).

astrointestinal continues to lose share in therapeutics-wise product mix, while anti-infective has gained share in mix.

Alcoholic Beverages

Karnataka budget implications likely to be neutral

The event

The Karnataka government, in its budget announcement on 15 March 2017, abolished the value added tax (VAT) on beer, wine and hard liquor. Three years ago, the state government had introduced a 5.5% VAT on liquor sold in bars and restaurants. The budget document also mentions an increase in additional excise duty on some slabs in the range of 6-16%. These measures will be effective from 1 April 2017.

Implications

National Representation of their national sales, in our view. Accounting for ~25% and ~14%, respectively, of their national sales, in our view. Our discussions with management of United Spirits indicate that the impact of these moves is likely to be neutral, with additional excise increases offsetting VAT repeal.

GST and highway ban remain near-term headwinds

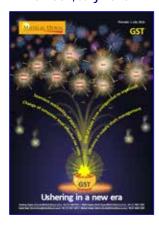

- while alcohol is kept out of the ambit of the Good & Services Tax (GST), many input raw materials for the manufacture of alcohol will attract taxes. Also, the tax rates on these raw materials are yet to be finalized. As input tax credit will not be available under the GST, alcoholic beverages companies are negotiating with various state governments for setoffs to lessen the cost burden. Companies are seeking price increases if the states are unable to provide setoffs. We believe the near-term volume and profitability prospects depend on how soon and effectively these issues are resolved.
- We believe the attorney general's statement that the liquor sale ban within a 500-meter radius of the national/state highways does not apply to bars and restaurants is encouraging from the perspective of the alcoholic beverages sector. However, it is important to note that the review petition will be heard later this month by the Supreme Court, which will have a final say on this issue. It is estimated that ~45% of all alcohol vending outlets are stationed at proximity of 500 meters or less to the highways. Of these, over 60% are bars and restaurants. Even if the ban (slated to be implemented from 1 April 2017) does not apply to bars/restaurants, we believe there would be supply disruption at other outlets until they move to a location outside of the 500-meter limit. This, in turn, is likely to impact sales of alcoholic beverages companies over the coming few months.

Our view: With growth levers in place, both United Breweries and United Spirits are well positioned to tide over these near-term challenges. We thus have **Buy** ratings on United Breweries (TP: INR1,044; 35% upside) and United Spirits (TP: INR2,885; 27% upside).

Refer to our report on United Breweries, October 2016

Refer to our report on GST, July 2016

Focus on M&A for exponential growth

- Focus on consolidation and customer diversification: After facing bottlenecks at its European operations and slowdown at its key India customers (TTMT and MM) over the past two years, MACA will now look to expand and consolidate its businesses. CY17E growth is likely to be led by order wins from Renault India, Caterpillar (gears business) and Ford Europe (via Bill Forge), as well as 20% growth at Bill Forge (BFL).
- n Targeting 20% RoNA: The main focus is to reach the targets set by its parent CIE Automotive: EBITDA margin of 15%, RoNA of 20% and Europe/India revenue CAGR of 2.2%/10% over CY17-CY20E.
- M&A to be important growth driver: In future, 50% of growth is likely to be driven by the inorganic route. The company aims to (1) acquire new and bigger customers (Maruti Suzuki and Hyundai), which bring higher volume with clean balance sheet and good track record, and (2) further diversify and reduce dependence on Indian customers. It is targeting to finance acquisitions via internal accruals, but would be open to raise equity funds for attractive M&A targets.
- No BFL operations to normalize and grow: After demonetization impacted 2W volumes, BFL operations are expected to normalize from 1QFY18, which would imply margin normalizing to ~20% level. BFL is expected to grow at a CAGR of 20% over next two years, led by normal growth in India, gradual ramp-up in Mexico operations and a new export order win from Ford. It is working on means to reduce working capital.
- started for its customer GKN to produce CV joints; it is likely to bag more orders from other customers. The new plant in Mexico is expected to operate at ~30% utilization in first year and 60% in second year. Investment of USD12m to generate USD20m by 2018 in a gradual manner. The target margin is likely to be at 12%. The import tax by the US if it comes is not likely to impact BFL Mexico operations significantly.
- Limited growth capex requirement: Current utilization level stands at >80% at CIE Spain, 70% at Germany/the UK and 65% in India excluding BFL. Metalcastello (50% utilization) is likely to do incremental business of EUR10m over next two years. Capex is likely to be ~5-6% of sales for next two years.
- n Content per vehicle reflects weaker mix of customers: The content per vehicle in case of products of MM has gone down from INR20,000/unit of Bolero and INR15-16,000/unit of Scorpio to ~INR12-13,000/unit of KUV100.

Ad volumes from new stations to support growth

Potential of 300-400bp margin expansion in next 3-4 years

- Three-pronged strategy of price increase in existing stations, expansion in new Phase-III stations, and growth in non-FCT business should support growth.
- EBITDA breakeven of new stations in FY18E, improving margin in non-FCT business, and potential price increase in existing stations should improve profitability.
- Post the commencement of all the stations acquired from Phase-III, ENIL's portfolio would expand from 32 radio channels to 76.

Three-pronged growth strategy

Price increase in existing stations: In the existing 32 stations, the management expects 6-8% revenue growth, led by pricing. Current utilization is about 100%, with peak advertisement of about 18minutes/hour. To improve listenership, ENIL plans to lower volumes, the impact of which would be offset by price increase.

Expansion in new stations: The new 17 stations in the first batch of Phase-III and 21 stations in the second batch of Phase-III would support volume-led growth.

Growth in non-FCT business: The non-FCT (free commercial time) business – on-the-ground activation business, concerts and events – contributes about 25% of ENIL's revenue. This business should grow at 10-12%. EBITDA margin should improve from the current single-digit levels; EBITDA margin of the activation business is over 20%.

Healthy profit outlook

With the three-pronged strategy, the management expects revenue growth of 15%. Additionally, EBITDA margin would improve, as the first batch of Phase-III stations start turning profitable from FY18, coupled with higher EBITDA margin in the non-FCT business. From the current 32%, EBITDA margin could scale up to 35-36%. For the incremental 21 second batch stations, investments are largely concluded.

Other key takeaways

- In the FCT business, EBITDA margin for the top-12 channels is about 46%, which could reach ~55% in the next three years. The 25% EBITDA margin for the other channels could also improve, with higher volume driving operating leverage.
- In the new stations, ENIL targets advertisement of less than 10minutes/hour, allowing it to garner better pricing than the 1st frequencies in few regions.
- Maintenance capex post the commencement of all channels would be a meager INR50m-100m per year.
- A recent AC Nielsen report highlights that from 2006, the time spent on radio has declined from 14 hours/week to 11 hours/week, which could be attributed to multiple digital engagement mediums. However, reach has increased, and this has led to higher revenue.
- Rollout of the second batch of 21 new stations would happen in 3Q-4Q of FY18 and the financial impact would be seen in FY19.

- Pre Phase-III, ENIL's total stations were 32. It has added 17 stations in the first batch of Phase-III auctions, of which 10 are in existing cities while seven are in new cities. In the second batch of Phase-III auctions, it has acquired 21 channels. It has also acquired four stations from TV Today. Thus, ENIL now has 74 stations. Additionally, ENIL intends to acquire three more stations of TV Today by March 2018 after expiry of the lock-in period. ENIL would be closing the channel in Goa; thus, its overall portfolio of channels would expand to 76.
- **n** Post the demonetization effect in the initial three months, advertisers are coming back and ENIL is witnessing positive signs.
- **n** ENIL has four brands:
- 1. Mirchi is the flagship brand across ENIL's 32 existing stations
- 2. *Mirchi Love* is ENIL's new brand, targeted at 26-30 year-olds. It is largely in new channels.
- 3. *Mirchi 95* is the second frequency of Bangalore and Hyderabad. It offers content similar to the primary frequency, but in different language. It caters to both regional and Hindi/English (Hinglish) listeners.
- 4. Ishq FM is the rebranded version of TV Today channel, Oye FM.

1. Bajaj Auto: On demonetisation and why 100cc bikes don't have a future; Rajiv Bajaj, MD

- The current market share stands at ~20% at retail level, which was ~14% in January 2015. Demonetisation and BS III stocks has affected this situation a little.
- **n** The 6% gain is equal to the absolute share of volume of a secondary player in the market place, which makes the gain very significant.
- Looking at a 2-year perspective, we aim to gain another 5-6% in market share. Would like to grow on whatever we have achieved in the past two years.
- Recovery from demonetisation was visible mid-December onwards, however, the situation is yet to normalise.
- Rural market saw more impact of demonetisation, where in 100cc motorcycle sales were more affected than the premium category bikes.

2. Escorts: Double-digit volume growth can continue if monsoons supportive; Bharat Madan, CFO

- n The Indian tractor industry could clock strong double-digit volume growth this year provided monsoons pan out as well as expected.
- Apart from monsoons, government policies that benefit the agricultural sector like higher minimum support prices could also boost sales.
- n The company is internally working on cutting costs and targeting double-digit margins too over the next couple of years. In nine months this year, the company has done margin of nearly 8%.
- **n** The company is also looking to increase export volumes and aims to hit nearly 10,000 units in tractor sales in the long term.
- with utilisation levels of the tractor unit at close to 65% and construction equipment at 30-35%, there would be no need for capacity enhancement over the next 3 years.

3. Morth: Cost to fall with integrated transport & logistics policy; Nitin Gadkari, Minister

- n Coming out with an integrated transport and logistics framework which aims at increasing the average speed of freight transportation on the highways network from the current speed of 20-25 km per hour to 40-50 km per hour and to reduce the logistics cost by almost half.
- **n** The government will be undertaking construction of 50 economic corridors across the country and setting up of 35 logistics parks at the existing freight clusters at a cost of Rs 5 lakh crore.
- Funding of economic corridors will be done through our budgetary allocation, raising NHAI bonds and also leasing out existing national highways to pension funds for collection of toll and operations at an upfront fee.
- **n** Can fund highway works of up to Rs 2 lakh crore on our own. Private players would be brought in for development and operation of logistic parks.
- **n** The policy is aimed at transforming India's logistics from a point-to-point model to a hub-and-spoke model to achieve reduction in logistics costs.

1. The first with no equals. by poornima joshi

"After two-and-a-half years, I have the courage of repeating the three things I said in 2014: that we are new, we perhaps have less experience. We can make mistakes but we will never do anything with wrong intentions. That we will work to our capacity. Whatever we do, we will do it with authenticity. This is one PM who is asked: Why do you work so hard?" — Prime Minister Narendra Modi, 11 Ashoka Road, March 12, 2017. As I watched the Prime Minister unhesitatingly underscore virtues that distinguish his brand from the others — morality, authenticity and hard work — I saw a gathering galvanised by the power of his raw appeal.

2. Food, energy, water security go together. by Rana Kapoor

with rising population, an expanding middle class, changing lifestyles and climate change putting a strain on resource availability, achieving food, energy and water security is becoming a prime concern. By 2050, India is expected to be the world's most populous country with 1.7 billion people, and the world's second largest economy with a GDP of \$42 trillion (in PPP terms). It is estimated that India would require to increase its annual food production by 30 per cent, to 333 million tonnes. In addition, more than 880 GW of new power generation capacity would be required by 2040.

3. Free Ipg or more Ipg? answer will determine whether pm narendra modi will plump for populism or reforms. by The Financial Express

n Though the 500-point rally in the Sensex after the BJP's sweep in Uttar Pradesh means the stock markets expect the freshly-empowered government to unleash a new set of reforms, another set of analysts are worried about a fresh bout of populism from a prime minister who is, of late, talking more of helping the poor—even demonetisation was packaged as a pro-poor measure—than he is of economic growth. Indeed, after the UP victory, sections of the ruling party talked of how the central government's ability to provide free LPG connections to 50 lakh rural poor, to electrify more villages.

4. A successful india is good for the world. by Kristalina Georgieva

n Down the winding, narrow alleys of one of the world's largest informal settlements is a revelation. The Dharavi Transit Camp Municipal School in the teeming metropolis of Mumbai is educating the most vulnerable and excluded children. Those with special needs—cerebral palsy, autism, as well as hearing, visual and speech impairments—receive therapy and rehabilitation and join other pupils in regular classes. This example of how the government of India is delivering services to the most vulnerable is a hopeful sign for the country.

5. Now, let up show the day. by Swaminathan S Anklesaria Aiyar

n The last bastion of caste politics has come around and voted for economic development." Thus did Arvind Panagariya, head of Niti Aayog, sum up Narendra Modi's swe Aayog, sum up Narendra Modi's sweeping victory in the Uttar Pradesh election. A state that historically has pulled India down can become a growth locomotive. There is an old joke about Muhammad Ali Jinnah demanding Kashmir, and Jawaharlal Nehru replying that he could have Kashmir provided he also took UP and Bihar. UP has almost 220 million people, or 16% of India's population. But only 12% of India's GDP. Its per-capita income and economic growth have always been below the national average.

International

6. The folly of Donald Trump's bilateralism in global trade. by Martin Wolf

The Marshall Plan is rightly regarded as among the most successful pieces of economic diplomacy in history. Yet it was not the money that mattered most. It was rather that it allowed war-battered western Europe to move away from mutually impoverishing bilateralism in trade. It did so by removing the dollar shortage that drove the emphasis on bilateral clearing. Institutionally, it did so by creating the European payments union within the Organisation for European Economic Cooperation. This led to convertibility on the current account and so to the world of liberal multilateral trade that we all now take for granted.

Disclosures

This document has been prepared by Motilal Oswal Securities Limited (hereinafter referred to as Most) to provide information about the company (ies) and/sector(s), if any, covered in the report and may be distributed by it and/or its affiliated company(ies). This report is for personal information of the selected recipient/s and does not construe to be any investment, legal or taxation advice to you. This research report does not constitute an offer, invitation or inducement to invest in securities or other investments and Motilal Oswal Securities Limited (hereinafter referred as MOSt) is not soliciting any action based upon it. This report is not for public distribution and has been furnished to you solely for your general information and should not be reproduced or redistributed to any other person in any form. This report does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, investors should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur.

MOSt and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group. We and our affiliates have investment banking and other business relationships with a some companies covered by our Research Department. Our research professionals may provide input into our investment banking and other business selection processes. Investors should assume that MOSt and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may educate investors on investments in such business. The research professionals responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting information. Our research professionals are paid on twin parameters of performance & profitability of MOSt.

MOSt generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, MOSt

MOSt generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, MOSt generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals or affiliates may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoingamong other things, may give rise to real or potential conflicts of interest. MOSt and its affiliated company(ies), their directors and employees and their relatives may; (a) from time to time, have a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions:, however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the affiliates of MOSt even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report Reports based on technical and derivative analysis center on studying charts company's price movement, outstanding positions a

Unauthorized disclosure, use, dissemination or copying (either whole or partial) of this information, is prohibited. The person accessing this information specifically agrees to exempt MOSt or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOSt or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOSt or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays. The information contained herein is based on publicly available data or other sources believed to be reliable. Any statements contained in this report attributed to a third party represent MOSt's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party.
