# PETRONET LNG LTD (PLNG)

#### PRICE: Rs.436

TARGET PRICE: Rs.457

- PLNG's Q4FY17 result is better than our and market expectations. The company has reported a PAT of Rs.4.7 bn (vs. our expectation of Rs.4.5 bn) up 92% yoy and 18% qoq (base effect), resulting in a quarterly EPS of Rs.6.3 and CEPS of Rs.7.6. The Board has recommended a dividend of Rs.5/share (as against Rs.2.5/share in FY16) and 1:1 bonus share.
- ❑ We expect LNG consumption to rise in India with lower customs duty, increasing government focus on pollution control and fuel economics. Additionally, there is a strong possibility of ban on furnace oil and petroleum coke in NCR, resulting in incremental demand on LNG.
- □ We expect FY18E earnings to be driven by acceleration in volume growth, supported by expansion. We are introducing FY19 estimates. At CMP, we believe that the stock is reasonably valued at 15.5x FY19E earnings. Considering the medium-term positive triggers, we revise our DCF based target price upward to Rs.457 (earlier Rs.412) including equity value of 26% stake in Dahej Port. However, we maintain ACCUMULATE rating on the stock.

#### **Key highlights**

- In FY17, Dahej RLNG terminal operated at 106% capacity utilization (on expanded capacity of 15 mmtpa). In FY17, PLNG processed 728 TBTUs of LNG including Kochi (~26% yoy higher). Of this Dahej terminal alone processed 714 TBTUs as against 566 TBTUs in FY16 due to capacity expansion. In Q4FY17, Dahej terminal processed 177 TBTU of LNG and operated at around 92% of its average increased name plate capacity.
- Kochi-Mangalore pipeline update: In the concall, the management highlighted that three out of four spreads of Mangalore pipeline have been awarded. Hence, out of 440 kilometers of pipeline, nearly 330 Kms of pipeline has already been awarded. Balance 110 km is expected to be award by June/July'17. Further, PLNG is also starting work on the Bengaluru sector.
- PLNG has acquired 26 percent stake in LNG vessel Prachi with an investment of Rs.750 mn. This is PLNG's fourth investment in LNG vessel.
- LNG price outlook: Currently, spot LNG prices (~USD 5.5-6/mmbtu) are trading lower than long-term gas prices resulting in higher demand for spot LNG as against long-term gas. The company guided that with lower crude oil prices long-term LNG prices are expected to come down.

#### **Key developments**

Dahej RLNG facility - With the completion of Dahej RLNG expansion, the Gujarat plant capacity has increased by 50% to 15 mmtpa capacity. Dahej capacity was expanded in two tranches in Aug'16 and Sep'16. EPC contract for further expansion of Dahej terminal to 17.5 mmtpa has been awarded and work is under progress as scheduled. In Q4FY17, the Dahej terminal processed RLNG at 177 TBTUs, higher by 85% yoy but lower by 7% qoq.

We would like to highlight that full 15 mmtpa capacity is fully booked giving decent revenue visibility. Take or pay agreement is entered with GAIL (2.5 mmtpa), GSPC incremental (1.0 mmtpa), IOC (1.5 mmtpa), BPCL (1 mmtpa) and Torrent power (1 mmtpa). Post this expansion, the company is planning for further expansion of Dahej terminal from 15 mmtpa to 17.5 mmtpa with addition of one LNG storage tank and 2.5 mmtpa regasification facilities. The company has awarded one EPC contract for regasification facilities.

- Kochi facility The company is currently supplying gas to two consumers -Fertilisers & Chemicals Travancore (FACT's fertilizer plant) and Kochi refinery.
- New business initiatives PLNG has over the years gained extensive experience in LNG handling capabilities. Now, it is taking steps to develop a small scale LNG market in India. Some of the initiatives undertaken are as follows:
  - a) PLNG to develop LNG bunkering: PLNG and Inland waterways authority of India (IWAI) will work together to develop the operation of LNG barges on Ganga, National Waterway-1, by the end of 2018. With this India's inland waterways will switch from diesel to LNG bunkers, reducing carbon emissions without additional operating costs.
  - b) **LNG as automotive fuel:** For land transportation, PLNG plans to provide LNG as automotive fuel for heavy duty trucks by setting up LNG dispensing stations on major highways.
  - c) **LNG as marine fuel:** In relation to water transportation, the company plans to provide LNG as marine fuel to LNG powered inland waterway barges, especially for national waterway.
  - d) **LNG powered locomotive:** The Company is also in discussion with railway authorities to introduce LNG powered locomotive in India.
- Overseas expansion PLNG is planning to spread its wings and is exploring possibility of setting up of LNG Terminal outside India and is in discussion with a few of our neighboring countries viz. Srilanka and Bangladesh.
- 4th LNG vessel: PLNG has acquired 26 percent stake in LNG vessel Prachi with an investment of Rs.750 mn.

#### **Result Analysis**

- Revenue and realization: PLNG's revenue for Q4FY17 was at Rs.63.7 bn which is up 1% on sequential basis and 5% yoy. The average net realization (LNG sold and service provided) was up 9% qoq to Rs. 360 per mmbtu (-43% yoy). In Q4FY17, the Dahej terminal processed highest-ever quantity of RLNG at 177 TBTUs, higher by 85% yoy but down 7% qoq. In FY17, PLNG processed 728 TBTUs of LNG (~26% yoy higher) as against 580 TBTUs in FY16.
- Raw material cost: Raw material cost (RLNG) for Q4FY17 was at Rs.55.2 bn down 1% qoq due to fall in international LNG prices. Raw material as a percentage of sales has decreased 150 bps qoq to 86.8%.
- Net-back (Net revenue less raw material cost): Net-back for Q4FY17 was at Rs.8.4 bn up 14% qoq mainly on account of higher sales and lower raw material cost. However, per unit net back was up 23% qoq to Rs.47.6/ mmbtu.

**Quarterly financials** 

Source: Company

- Staff cost: Employee cost decreased 7% qoq (base effect) and 4% yoy to Rs.181 mn.
- Other expenditure increased significantly 80% qoq and 264% yoy to Rs.2.086 bn due to expansion of Dahej terminal. Other expenditure as a percentage of sales increased 144 bps qoq and 230 bps yoy to 3.28%. We expect going ahead other expenses as a percentage of sales to reduce.
- Operating profit (EBIDTA): For Q4FY17, the operational profit increased 1.5% qoq to Rs.6.2 bn (+24% yoy). The company recorded EBIDTA margin of 9.7% increased 150 bps yoy but flat sequentially. Higher operating profit is supported by higher tariff.
- Depreciation: In Q4FY17, PLNG's depreciation cost has increased by 0.7% qoq and 27% yoy to Rs.1 bn. The company has capitalized Dahej phase-III and storage tanks.
- In Q4FY17, finance cost reduced 9.2% qoq to Rs.469 mn (-12% yoy). Earlier, PLNG has replaced its rupee loan of ~Rs 10.32 bn (average cost 11% annually) with lower cost unsecured bonds of Rs 10 bn (~9% annually) placed in the Indian market. Gross debt as on 31st March 2017 stands lower at Rs.23.3 bn. With strong operating cash flow, PLNG has partly paid off its debt.
- PBT for Q4FY17 was at Rs.6.2 bn up 21% on sequential basis and 72% yoy on account of higher operating income, lower interest cost and higher other income.
- Income tax: The Company paid tax of Rs.1.48 bn (at an average rate of 23.9% in Q4FY17 v/s 22% in Q3FY17). The company got tax benefits under Sec 80IA and investment allowance for Dahej expansion.
- PAT for Q4FY17 was at Rs.4.7 bn up 18% qoq on account of higher operating income, higher other income and partly due to base effect. The Company reported quarterly EPS of Rs.6.3 and CEPS of Rs.7.63.

#### **Valuation & Recommendation**

We maintain ACCUMULATE on Petronet LNG with a price target of Rs.457 We expect FY18E earnings to be driven by acceleration in volume growth, supported by expansion. We are introducing FY19 estimates. At CMP, we believe that the stock is reasonably valued at 15.5x FY19E earnings. Considering the medium-term positive triggers, we revise our target price upward to Rs.457 (earlier Rs.412) including equity value of 26% stake in Dahej Port. However, we maintain **ACCUMULATE** rating on the stock.

#### **Company back ground**

Petronet LNG is India's largest importer of liquefied natural gas (LNG) at its Dahej plant. It has expanded the Dahej capacity to 15 mmtpa.

PLNG has a firm supply contract with Qatar's RasGas for 8.5 mmtpa for which it has a back-to-back sales contract. It also imports LNG on a spot basis depending on its ability to market the same in domestic market.

Similarly, it also imports cargos on behalf of other importers for a fee. The company currently charges Rs 42.57 per MMBTU as regasification charges, which are set to go up 5% every year in January.

LNG terminal at Kochi

### **Petronet LNG terminal**

Dahej terminal expansion from 10 to 15 mmtpa

Source: Company

**Notes:** LNG is natural gas in its highly compact liquid form. When natural gas is cooled to minus 260 degrees Fahrenheit (or minus 162 degrees Celcius), it is reduced to one six-hundredth of its original volume and becomes a clear, non-toxic liquid. LNG offers a safe and economical means for transporting natural gas over long distances to locations beyond the reach of pipelines. LNG is loaded on specialized ships and delivered to a regasification terminal where it is reheated, turned into gas and distributed to customers through a pipeline network.

#### **Key Risk and Concerns:**

- 1). Regulatory risk: Any capping of margins by PNGRB will negatively impact its earnings and growth. However, management has indicated that imported LNG does not fall under the preview of PNGRB.
- 2). Project execution risk.

## **Result Highlights**

CUMI consolidated revenue stood at Rs 5.6 Bn in Q4FY17, up 11.6% YoY driven mainly by abrasives and ceramics divisions. Standalone revenue reported 10% YoY growth at Rs 3.8 Bn (8.8% YoY growth in FY17) on back of a/ market share gain in domestic abrasives market and b/ improved sales in industrial ceramics business. We note that earlier in Q3FY17 earnings call management highlighted that CUMI abrasives segment underperform the competition due to higher proportion of counter sales. However, we believe that the effect of demonetization in largely over and abrasives division could further benefit from increased momentum in the sales of coated abrasives. We believe that the company is well poised to benefit from recovery in infrastructure spending creating demand for company's products.

In international abrasives business, management maintained that the business environment is recovering at a reasonable pace, mainly in Russia, where CUMI is present through its subsidiary VAW. The abrasives part of Russian business has cut losses in FY17. We note that company has lost c.5000 MT in VAW in 1HFY17 due to issues related to power supply. Company has taken necessary step to restore power and management expects to make up for the lost volumes in FY18. Capacity utilization in VAW is fairly high and company has planned to expand capacity for thin wheeled and coated abrasives in Russia. Abrasives division reported, consolidated sales of Rs 2.6 Bn in Q4FY17 vis-à-vis Rs 2.3 Bn in Q4FY16. EBIT margins for abrasives segment stood at 10.6% in Q4FY17.

nent reporting (Consolidated)

Ceramics business reported sales at Rs 1.3 Bn in Q4FY17(+19.2% YoY) in Q3FY17 at consolidated level, led by improved demand for value added/engineered ceramics. However project related part of ceramics business continues to remain challenging. Outlook for metalized cylinder (Metz) remains encouraging and volumes are expected to further improve in FY18. Commissioning of NTK plant (currently in setting up phase) would contribute to revenues from FY18 onwards. Management anticipates that the refractory business would also recover, being aided by successful shifting and commissioning of Thukela plant. EBIT margins improved to 15.8% in Q4FY17 against 14.6% in Q4FY16. We believe that with increased contribution from value added products, ceramics division would report further margin expansion going ahead (ceramics division reported 14% EBIT margin in FY17).

Electrominerals division (EMD), consolidated sales stood at c.Rs 2 Bn in Q4FY17 (+ 6.5% YoY). Demand for specialty products continues to remain strong in EMD division as well. With streamlining of operation in Russia (fixing power related issues) management expects significant ramp up in EMD business going ahead. CUMI has successfully shifted Thukela/Foskor plants in India and these businesses would start contributing from the current quarter itself (while fully realizing potential during the course of the current financial year).

7

Power & fuel costs, reported sharp rise at Rs 667 mn (+28.3% in Q4FY17) due to increase in power cost in Kerela. Consolidated EBITDA margins stood at 17.6% in the quarter. CUMI reported a forex loss of Rs 60 mn against loss of Rs 44 mn in Q4FY16. EBITDA margins in the quarter are primarily led by increased volumes in value added products and cost savings in the international subsidiaries.

Finance cost reduced to Rs 42 mn in Q4FY17 from Rs 52 mn in Q4F716 on account of substantial reduction in debt (net debt reported at Rs 30 mn at the end of FY17 against Rs 1.2 Bn in FY16).

#### **Valuation and Recommendation**

We increase FY19 earnings estimate by 4.2% to factor in a/expected pickup in demand for key products and b/ increased sales from value added products with superior realizations.

We recommend BUY on Carborundum Universal Ltd with a price target of Rs.338 We roll forward our target price on FY19; value CUMI stock at 20x FY19 estimated earnings (23x FY18 earnings earlier) and move recommendation to **'BUY'** from 'Accumulate' with revised price target of Rs 338 (Rs 305 earlier).

# ZEE ENTERTAINMENT ENTERPRISES LTD (ZEEL)

### PRICE: Rs.516 TARGET PRICE: Rs.470

RECOMMENDATION: SELL FY19E P/E: 25.5x

Zee Entertainment's operating financials are in line with our estimates, at the headline level. The results indicate that domestic advertising revenues are holding up better than our expectations, but also carry a warning of (potentially recurring) weakening in international revenues. Domestic subscription revenues, weaker than our estimates in this quarter, could also see significant pressures going forward (on the implementation of TRAI's tariff order). Net-net, while we continue to project healthy 14%/ 40% CAGR in EBITDA/EPS through FY17-FY19E, we recognize that ZEEL is likely to face considerable uncertainty in the quarters to come, particularly with regard to domestic subscription/ advertising revenue trade-off. We therefore see reason to opt for a conservative 23X FY19E PER multiple, on earnings that may turn out to be mere liner extrapolations for a potentially chaotic business environment. Maintain SELL, while we raise our price target to Rs 470 (Rs 400 earlier, as we roll-forward to FY19).

Source: Company Reports

Zee Entertainment's 4QFY17 financials, at the headline level, have come in broadly in line with estimates. Revenues registered 0.4% y/y growth, modestly below estimates. Advertising revenues were flat in the quarter, and subscription revenues registered 6% y/y decline - we note that the financials carry the impact of sale of sports business of the company, and are not strictly comparable on a y/y basis. Both advertising and subscription revenues came in below our estimates. However, other sales registered significant growth in the quarter, offseting misses on the advertising and subscription income lines.

Kotak Securities Limited has two independent equity research groups: Institutional Equities and Private Client Group. This report has been prepared by the Private Client Group. The views and opinions expressed in this document may or may not match or may be contrary with the views, estimates, rating, target price of the Institutional Equities Research Group of Kotak Securities Limited. Advertising revenues of the company were adversely impacted by sharp decline in international advertising revenues, while domestic advertising revenues grew 8.1%, despite the sale of sports business in the quarter. Ex-international, exsports, advertising revenue growth in the quarter was 8.6% - ahead of our estimates. International advertising revenues were impacted by two significant factors - weak economic conditions in the Middle-East as well as certain regulatory changes in Bangladesh. Although the management refused to provide any guidance about revenue growth in international operations, it appears to us that a lot of the weakness witnessed in the quarter is likely to be recurring in nature.

Subscription revenues registered a decline, apart from the exclusion of sports for a month, due to: a/ lumpy subscription revenues in 4QFY16, and b/ due to decline in international subscription revenues, which have also suffered on some disturbances.

Other sales, which largely constitute revenues from syndications, movies, and live events, registered a sharp rise in the quarter.

Operating expenses declined on expected lines, due to lower expenses on sports (consolidation for two months, and higher costs of two events held last year). Employee expenses rose sequentially on incentive payouts. Advertising and publicity expenses came in lower than our expectations, and aided a modest beat on the EBITDA line. Growth in PBT is lower than our estimates, on higher expensing of investments.

The first phase of sale of sports business to Sony Pictures Network has been completed and \$330 mn has been received during the quarter, which drives the exceptional items. The company's release indicates that ZEEL shall look to utilize these funds to extinguish its preferance share liability.

Following are highlights from the comments made by the management during the conference call: a/ the adverse impact of demonetization is largely behind, in so far as advertising expense by copmanies is concerned. TV industry advertising revenues shall likely register low teen growth in the coming year, b/ the company refrained form providing guidance on subscription revenue, given uncertainties relating with the tariff order; management however said that assuming rationality from industry players, domestic subscription revenues could see mid-teens/ high teens growth c/ the compnay shall aim to maintain EBITDA margin of over 30% in the coming years, and depending on the phasing of investments, the company could see higher margins in the nearer - term (roughly to the extent of 300-400 bps), d/ the company is raising investments in content, including movies for its library, movie production, digital, and music, e/ on the impact of the (acquired) RBN channels, the management believes that (while these brought in substantial losses earlier), the impact of these on EBITDA shall be positive from the very first year.

#### **Outlook and Investment View**

To summarize our assessment of the company's business situation vis-à-vis our last update: a/ the company's domestic advertising revenues are holding up better than our prior expectations, given the weakness that the company's flagship Hindi GEC has seen. We believe this outperformance (relative to our expectations) is a result of the strength that the company's regional channels (especially Marathi and Tamil) have shown. b/ unexpectedly, international revenues of the company have crashed in the quarter. International revenue stream of the company, along with its strong domestic subscription revenue stream, is what separates ZEEL from relative new-comers (such as Viacom18) in so far as profitability is concerned. The sharp decline in international revenues witnessed in the quarter shall reduce the comfort investors have placed in the sustenace of ZEEL's dominance in international markets (note that ZEEL shores up about 60-65% of the international revenues generated by all Indian channels). c/ given that there is a significantly higher likelihood of the tariff order being implemented, the risks to ZEEL's business model could be fairly large. There is an incentive for compa-

10

nies (such as MSM, Viacom18) to consider business models that would be unthinkable for entrenched broadcasters (pure FTA, as an extreme example, in case that the company generates net subscription revenues that could be offset by higher advertising); accordingly, 'rationality' may have different meanings for different participants.

That said, we think the consensus is, for now, bound to favour a lnear view of advertising and subscription revenues, and we think that the changes to ZEEL's (consensus) earnings estimates shall be modest (even) following the higher likelihood of sea-change in the distribution of TV channels. While the consensus earnings may not be wrong (our estimates are, in fact, c.4% ahead of consensus), we emphasize that there is a significant risk to these; implementation of the tariff order could lead to big changes in competitive intensity and could have implications for ZEEL's competitive positioning.

We maintain SELL on Zee Entertainment Enterprises Ltd with a price target of Rs.470

We estimate 5.3%/12.6% growth in sales for ZEEL in FY18/19 (the deceleration in FY18 is on account of sports business being in the base, and zero growth expected in international advertising revenues, and our belief that ZEEL is likely to register advertising revenue growth in line with the industry. We factor in 2.9 ppt expansion in margins through the forecast period, on absence of losses in sports business. Net profit is likely to be sharply higher as ZEEL has incurred significant losses on fair value through P/L, which is assumed to be zero going forward (adds ~Rs 2.5 to EPS estimates in FY18/19); further, there are benefits of higher other income. Our FY18 estimates have been cut 4% on lower expectations from international operations.

Thus, while EPS growth of the copmany is likely to be strong, we expect operating income to register relatively low growth, and we believe there could be significant downside risks to our estimates, due to which we see reason to exercise caution in valuation of the stock. We value the stock at 23X FY19E PER, or Rs 470 (up from Rs 400 earlier, as we roll-forward to FY19). Maintain **SELL.**
