## Nifty at Critical 8076 Support, Dollar Index at 12 Year High

**Indian Market Outlook:** The Indian Benchmark Index Nifty saw a continued selling yesterday where it fell by 128 points from its day's high of 8168 to 8040, to finally close at 8100, just below its previous day's low of 8095. FIIs continue their selling spree with a total sell worth Rs. 9616 in last 6 trading sessions. Small Cap too was under pressure yesterday and closed at 5611, below its previous day's low of 5624. Demonetization done by our PM seems to have stirred the entire country as evident from the market prices along with the FII's vicious selling in the Indian markets. Nifty major support of 8076 if breached can put pressure and markets can go to the psychological level of 7920 made during Brexit on June 24. Dollar Index has given a breakout above its 12 year high of 100.51. Strengthening Dollar and heavy FII selling in the cash market clearly signals that Dollar is being withdrawn from the country as US gets ready for an increased chances of December interest rate hike. 8076 is a critical support for Nifty, below this market may witness further pressure.

Nifty Futures is expected to open at 8086 as per SGX Nifty at 8:30 am IST, which is 14 points below its previous close of 8100.
