## Outlook for the day

Indian Equity market settled below 8000 on F&O expiry day amid excessive volatility, down by nearly a percent. Weak global cues were weighing on sentiments from the beginning, mainly in reaction to upbeat US economic data and Fed meeting minutes, reinforcing the possibility of rate hike in December. Continued disruption in Rajya Sabha by opposition parties over currency demonetisation also dented the market sentiment. On the technical front, the trend in index still remains to be in a bear grip with immediate supports pegged around 7900 levels followed by 7850 levels. While on the upside resistance for the index is seen around 8060 levels and above that at 8100 levels. However one need to keep in mind that the market is deeply oversold and we may witness a decent bounce soon. On the F&O front rollover of open interest positions to the December series of the Nifty is 63 per cent, lower than the three-month average of about 71 per cent. Market-wide rollovers stood at 70 per cent, which is also lower than the average previous three-month figure of 76-78 per cent. The roll cost was low at 48-50 basis points compared to an average of 60-65 basis points indicating that positions have been rolled over but with caution
