Yes Bank posted 1QFY11 PAT growth of $56 \%$ YoY to Rs1.6b (against our estimate of Rs1.4b), driven by strong loan growth (up 107\% YoY) and other than expected provisions. Non-interest income declined by 10\% QoQ and 5\% YoY to Rs1.4b due to a fall in financial markets income, however income from financial advisory remains strong. Key highlights

- Loans grew $107 \%$ YoY and $18.3 \%$ QoQ driven by higher disbursements in the corporate and institutional banking (C\&IB) segment. Part of this growth can be attributed to disbursement in the telecom sector (largely short-term) and the infrastructure space.
- NIM declined 10bp QoQ to 3.1\% (stable YoY) led by fall in yields on loans. CASA deposits in absolute terms grew $118 \%$ YoY resulting in CASA ratio improving 100bp YoY to $10.5 \%$.
- Other income declined by 5\% QoQ due to a fall in income from financial markets (a sharp drop in treasury gains and lower volumes in debt capital markets). Core non-interest income was Rs1.4b against Rs1.1b in 1QFY10. While financial advisory showed strong traction QoQ and YoY, a sequential decline in transaction banking income disappointed.
- Asset quality improved with GNPA ratio at $0.23 \%$ and net NPA ratio at $0.04 \%$. PCR was $81 \%$ (v/s $78 \%$ in 4QFY10). Valuation: Yes Bank trades at $11.9 \times$ FY12E EPS of Rs25 and $2.3 \times$ FY12E BV of Rs130. RoA is likely to remain strong at $\sim 1.5 \%$ and increased leverage will drive RoEs to $\sim 20 \%+$ in FY11 and FY12. Maintain Buy with a target price of Rs325.

[^1]Stable margins, strong loan growth lead to robust NII growth
NII grew by $67 \%$ YoY ( $7 \%$ QoQ) backed by loan book growth of $107 \%$ YoY and $18.3 \%$ QoQ to Rs262b. Higher disbursements in the corporate and institutional banking (C\&IB) segment led the growth. The proportion of loans to the C\&IB segment increased from $69 \%$ in 4QFY10 to $73.4 \%$ in 1QFY11. The management expects loan growth to moderate to $40-45 \%$ in FY11 due to repayment of short-tenure loans and higher base.

NIM was stable at 3.1\% YoY (but declined 10bp QoQ). Cost of funds declined by 180bp YoY (stable QoQ) to 6.3\% and yield on loans declined 290bp YoY (down 10bp QoQ) to 9.6\%. In an increasing rate scenario the bank could have a negative impact on NIMs (low CASA mix) but sustained systemic growth could lead to better pricing power on lending and would result in NIMs remaining stable.

## CASA ratio improves 100bp YoY

Deposits increased 97\% YoY and 12.3\% QoQ to Rs268b. CASA deposits grew by 118\% YoY and $12 \%$ QoQ to Rs31.2b. CASA ratio improved 100bp YoY and was sequentially stable at $10.5 \%$. With branch expansion ( 100 branches proposed to be opened) and focus on garnering higher retail deposits, CASA ratio is likely to improve.

## Mixed performance from different fee income stream

Non-interest income declined by $10 \%$ QoQ and $5 \%$ YoY to Rs1.4b due to a fall in income from financial markets. Core non-interest income was Rs1.4b against Rs1.1b in 1QFY10. Financial markets related income was Rs226m in 1QFY11 (v/s Rs.919m a year earlier and Rs474m in 4QFY10) due to lower treasury gains and lower volumes in the debt capital markets.

Financial advisory income increased from Rs253m in 1QFY10 to Rs.761m in 1QFY11 (v/ s 578m in 4QFY10). Transaction banking fees grew by $37 \%$ YoY to Rs.343m (on a lower base), but it was down by $21 \%$ sequentially (a negative surprise). The management expects better traction in transaction banking through the addition of new clients.

## Cost to income ratio to go up

Operating expenses grew $41 \%$ YoY and $7 \%$ QoQ to Rs1.6b as the bank raised staff salaries and added about 400 employees in 1QFY11. Employee expenses were up $37 \%$ YoY and $15 \%$ QoQ. Other operating expenses were sequentially stable as the bank added only three branches during the quarter, taking the total number of branches to 153. Cost to income ratio was ( $39 \%$ against $36 \%$ in 4 QFY10). Over the past six quarters cost-toincome ratio was below $40 \%$ and has been one of the key factors for RoA expansion. The management expects to add 100 branches and about 1,000 employees in one year, which will lead to pressure on the C/I ratio.

## Strong asset quality

Asset quality was stable with GNPA in absolute terms remaining flat at Rs602m (Rs614m in 4QFY10). GNPA ratio in percentage terms improved to $0.23 \%$ ( $\mathrm{v} / \mathrm{s} 0.27 \%$ in 4QFY10) and NNPA ratio was $0.04 \%$ (v/s $0.06 \%$ in 4QFY10). Provision coverage ratio improved from $78 \%$ in 4QFY10 to $81 \%$ in 1QFY11. Including standard asset provisions, provision coverage ratio improved to $309 \%$ in 1QFY11 from $274 \%$ in 4QFY10. The bank's restructured loans were steady at Rs 0.8 b (31bp of the loan book v/s 0.36 bp in 4QFY10 and 0.94 bp in 1QFY10).

## Comfortable capital position for near term growth

CAR was $16.57 \%$, tier-I was $10.32 \%$. As per RBI guidelines unaudited quarterly profits are not considered in capital funds, or else the CAR would be 70bp higher.

## Valuation and view

Yes Bank is well placed to benefit from the economic buoyancy as it offers a diverse range of products and has an experienced and capable top management team with a proven track record. With substantial growth in its branch network in the next couple of years, we expect strong traction in its business to continue.

We believe Yes Bank will be able to maintain RoA of $\sim 1.5 \%$ and RoE of 19-20\% in FY11 and FY12 backed by: (1) loan growth of $40 \%$, (2) healthy margins of $\sim 3 \%$, improving CASA ratio and pricing power, (3) strong growth in fee income due to higher advisory, forex and third party distribution income, and (4) stable credit costs, as its asset quality is among the best in the industry. Yes Bank trades at 11.9x FY12E EPS of Rs25 and 2.3x FY12E BV of Rs130. Maintain Buy.

## Yes Bank: an investment profile

## Company description

Yes Bank began operations in May 2004. Its promoters, who established Rabo India Finance as a leading investment bank in India, have the distinction of obtaining RBI's only green-field banking license in the past decade. Yes Bank has built a strong management team with experience from foreign banks for each of its business units. It has fructified into a "full service" commercial bank with 153 branches and a balance sheet of Rs 409 b. It aims to scale up its branch network to 250 with a CASA ratio of $\sim 25 \%$ by FY12 (currently 10.5\%).

## Key investment arguments

- Rapid branch network expansion, acquisition of new customers and deepening of existing customer relationships would help ensure that its asset growth is significantly higher than that of the industry.
- Asset quality is robust with GNPA ratio of $0.23 \%$ and NNPA ratio of $0.04 \%$.
- Strong asset quality, higher fee contribution and operating efficiency will keep RoA strong at $1.4 \%+$ and ROE at $19 \%+$.

## Key investment risks

- Yes Bank's growth plans are heavily dependent on obtaining branch licenses. Any delays in getting branch licenses from RBI, it could adversely impact valuations.
- Inability to improve CASA ratio given high asset growth aspirations would make the bank vulnerable to a liquidity risk.

## Recent developments

- Rabo Bank sold $11 \%$ stake in the bank for its own banking foray in India.
- Yes Bank announced a maiden dividend of Rs1.5/share for FY10.

## Valuation

RoA is likely to remain strong at $\sim 1.5 \%$ and increased leverage would drive RoEs to $\sim 20 \%+$ in FY11-12. Yes Bank trades at 11.9x FY12E EPS of Rs25 and 2.3x FY12E BV of Rs130.Maintain Buy with a target price of Rs325 (2.5x FY12E BV).

## Sector view

- In FY10 loans and deposits grew 17\%. We expect loan growth of $20 \%$ in FY11 with an upward bias. Deposit growth will be calibrated with loan growth.
■ We factor in a $15-20 \mathrm{bp}$ improvement in blended margins, led by an improving yield on assets and a higher CASA ratio.
- Our concern over asset quality is diminishing with the improvement in economic activity.
- We prefer banks with a strong core deposit franchise, higher tier-I capital and high provision coverage ratio.
