Today's top research idea

Aditya Birla Lifestyle Brands - Well-Stitched Brands, Loose Ends in Execution

- ❖ Aditya Birla Lifestyle Brands (ABLBL) will be listed on 23rd Jun'25. ABLBL was demerged from Aditya Birla Fashion and Retail (ABFRL) in May'25 and comprises four industry-leading lifestyle brands (Louis Philippe, Van Heusen, Allen Solly and Peter England) and emerging brands such as Van Heusen Innerwear, Reebok and American Eagle.
- ❖ We expect ABLBL to deliver ~10% revenue CAGR over FY25-28E, driven by 1) acceleration in retail store additions in lifestyle brands, 2) improvement in store productivity, and 3) scale-up of emerging brands. Driven by lower discounting, an improved channel mix and operating leverage benefits, we expect gross/EBITDA margin to expand ~80bp/~140bp to 59%/16.6% by FY28E. Further, ABLBL could generate cumulative FCF of INR11b over FY25-28E, which should help ABLBL to become a net-cash company (excl. leases).
- ❖ We ascribe a TP of INR190/share (vs. ~INR171/sh implied price on demerger), premised on 15x FY27E EV/EBITDA for lifestyle brands and ~1x FY27E EV/sales for emerging brands. We assume coverage on ABLBL with a Neutral rating.

Well-Stitched Brands, Loose Ends in Execution

Aditya Birla Lifestyle Brands (ABLBL) will be listed on 23rd Jun'25. ABLBL was demerged from Aditya Birla Fashion and Retail (ABFRL) in May'25 and comprises four industry-leading lifestyle brands (Louis Philippe, Van Heusen, Allen Solly and Peter England) and emerging brands such as Van Heusen Innerwear, Reebok and American Eagle. We expect ABLBL to deliver ~10% revenue CAGR over FY25-28E, driven by 1) acceleration in retail store additions in lifestyle brands, 2) improvement in store productivity, and 3) scale-up of emerging brands. Driven by lower discounting, an improved channel mix and operating leverage benefits, we expect gross/EBITDA margin to expand ~80bp/~140bp to 59%/16.6% by FY28E. Further, ABLBL could generate cumulative FCF of INR11b over FY25-28E, which should help ABLBL to become a net-cash company (excl. leases). We ascribe a TP of INR190/share (vs. ~INR171/sh implied price on demerger), premised on 15x FY27E EV/EBITDA for lifestyle brands and ~1x FY27E EV/sales for emerging brands. We assume coverage on ABLBL with a Neutral rating.

ABLBL: Portfolio of India's leading fashion brands and emerging brands

- After the demerger from ABFRL, ABLBL comprises four established lifestyle brands (Louis Philippe, Van Heusen, Allen Solly and Peter England) and emerging brands such as Van Heusen Innerwear, Reebok and American Eagle.
- ABLBL is the pioneer in the branded apparel industry with over three decades of presence. It has scaled up Madura Fashion from revenue of ~INR2b in 1999 to INR78b+ in FY25.
- ABLBL's four power brands have a strong presence across formals, casuals, sportswear and ethnics and have top-of-mind recall, which has enabled all four brands to cross INR10b in annual revenue.
- ABLBL has a retail presence of 3,250+ stores spanning a retail area of ~4.6m sqft and a wide presence across LFS, MBOs and online channels. The company follows an asset-light model, under which 70% of stores are franchisee-owned.

Targets consistent double-digit growth in revenue and EBITDA

- Management aims to double revenue over FY24-30 (11%+ CAGR), driven by high-single-digit L2L and network expansion (250+ net store additions annually).
- It has set a mission to have at least three brands in the INR25b category and scale up emerging brands profitably in the next 2-3 years.
- Management aims to expand margins by ~300bp, improve pre-INDAS RoCE to ~70% by FY30, and become debt free in the next 2-3 years.
- Further, management expects ABLBL to be a dividend-paying company, given its likely strong cash flow generation.

Valuation and view

- We expect ABLBL to deliver ~10% revenue CAGR over FY25-28E, driven by 1) acceleration in retail store additions in lifestyle brands (~700 net store additions over FY25-28E), 2) improvement in store productivity (~3.5% SPSF CAGR over FY25-28E) and 3) scale-up of emerging brands.
- Driven by lower discounting, an improved channel mix, a scale-up in profitability of emerging brands and operating leverage benefits, we expect gross/EBITDA margin to expand ~80bp/~140bp to 59%/16.6% by FY28E.
- PAT growth is likely to be significant (~51% CAGR over FY25-28E), driven by operational improvements and benefits of deleveraging.
- We expect ABLBL to generate cumulative FCF of ~INR11b (post leases and interest) over FY25-28E, which should lead to net cash position (excl. leases) and dividend payouts by FY28E.
- Based on the share price of demerged ABFRL immediately after the demerger, the market is ascribing ~INR171/sh or ~INR210b market cap to ABLBL.
- We value ABLBL based on the SoTP methodology. We ascribe 15x FY27E EV/EBITDA multiple to ABLBL's lifestyle brands and ~1x FY27E EV/sales multiple to ABLBL's emerging brands to arrive at a **TP of INR190/share** or ~INR230b market cap, which **implies ~16.5x FY27E EV/EBITDA** (or **~28.5x FY27E pre-INDAS EBITDA**).
- **We assume coverage on ABLBL with Neutral rating.**

Key risks and concerns

- Persistent weakness in demand could affect its store addition plan and SSSG for existing stores.
- A slower-than-expected scale-up of emerging brands,
- Higher-than-expected rental and manpower cost escalations,
- Capital misallocation through non-value-additive M&As, and
- Exit by shareholders (who invested for demerger gains or recent investors in ABFRL's fund raise) could also be near-term overhang.

SOTP-based valuation on Mar'27E basis

Leveraging disciplined distribution capabilities to build momentum **Axis Max Life Insurance**

FY26 guidance: VNB margin at 24-25%; reiterate NEUTRAL

We met with Mr. Prashant Tripathy, MD and CEO of Axis Max Life Insurance (MAXLIFE), to discuss the company's aspirations, product mix changes, distribution capabilities, and the impact of regulatory changes. Here are the key takeaways from the discussion:

Enhancing capabilities beyond bancassurance

- **Axis Bank remains core to growth; channel momentum expected to return:** Axis Bank continues to be the cornerstone of MAXLIFE's distribution strategy, with over 6,000 embedded employees across ~5,000 branches. Despite intensifying shelf-space competition within the bank, MAXLIFE has successfully defended its counter share. With easing deposit pressures and a likely softening interest rate environment, management anticipates a revival in bancassurance-driven APE growth. A 15% growth in this channel could elevate MAXLIFE to the No. 3 position among private life insurers by FY26 (11/12% growth in FY24/FY25).
- **Agency strategy pivoted toward quality and digital-led productivity:** Post-2016, there has been a renewed focus across the industry on revitalizing the agency channel. MAXLIFE has adopted a differentiated strategy by prioritizing agent productivity over sheer expansion. This involves three key pillars: 1) Digital activity management tools, including AI-driven pitch assessments; 2) A structured training ecosystem with trainer benchmarking; and 3) a robust engagement framework anchored in goal setting and real-time tracking. The company also aims to build a comprehensive 'superapp' to integrate agent activity, training, and incentives—a move expected to deepen channel discipline and operational control.
- **Proprietary channels gaining momentum:** Channels like Direct Sales Force and Online have witnessed strong traction, which was primarily ULIP-led. The company expects growth to moderate to 25-30% due to the impact of a high base. Commission rationalization due to surrender value regulations has created a challenge for agents, especially those at a nascent stage. However, with the reset of base, training interventions, expansion of agency presence beyond the current 250 cities, and deepening presence in Tier 2+ regions, the channel is expected to deliver 15-20% growth. Continued growth momentum in the proprietary channel will play a key role in reducing dependence on the Axis Bank channel to ~40%.

**Mr. Prashant Tripathy,
MD & CEO, MAXLIFE**

Mr. Prashant has been associated with MAXLIFE since 2007. He has three decades of experience across business leadership, strategy, finance, operations and investor relations. He has a Chemical Engineering degree from IIT Kharagpur and PGIM from IIM Bangalore.

Product strategy driving margin accretion

- **Rider attachment in ULIPs helped achieve the margin sweet spot:** ULIPs continue to anchor MAXLIFE's product mix (35%/42% in FY24/25). The recent rise in sales of high-sum-assured variants, along with strong rider attachment, has boosted product-level profitability. While the low-margin image of ULIPs has historically weighed on VNB, these margin accretive levers have enabled MAXLIFE to improve ULIP's contribution to overall VNB margins. That said, the incremental margin headroom from ULIPs now appears largely exhausted.
- **Non-par momentum building despite annuity constraints:** MAXLIFE is scaling its non-par segment, supported by favorable economics and superior distributor alignment. While annuities remain structurally competitive due to transparent pricing and thin spreads, traditional non-par savings products are witnessing a rise in customer acceptance—a trend MAXLIFE plans to further capitalize on.

- **Measured bet on protection:** Despite demand challenges, MAXLIFE remains committed to the protection segment. The company has added health and rider benefits to improve penetration as strong growth momentum from pure protection is unlikely. Limitations in data availability for cohorts like self-employed and lower-sum assured cohorts like housewives continue to restrict rapid growth. Protection penetration of 30-35% in metros, compared to life insurance penetration of 70-75%, reflects the low demand for the product, due to which the industry remains conservative toward protection.

Regulator actively addressing mis-selling

- **Regulatory challenges:** Growth in life insurance has moderated from post-demonetization highs. While tax changes and recent surrender value regulations have shaved off ~5-6% of potential growth, the industry is expected to post **mid-to-high teen APE growth**, barring regulatory disruption.
- **Action on bancassurance not expected to be detrimental:** Open architecture structure in bancassurance channel, especially in larger banks, has boosted growth for the industry. Media reports have been rife with claims that the regulator may cap the channel's contribution to the overall mix. However, considering: 1) the healthy and improving persistency ratios of the channel, and 2) its 50-60% contribution to the business mix for private insurers, the channel remains critical to achieving the Insurance for All by 2047 vision.
- **Composite license:** Discussions around the introduction of a composite license in the monsoon session of Parliament have heightened. MAXLIFE is evaluating three options: acquisition, building in-house health insurance manufacturing capabilities, and white-labeling. Given the potential for rapid go-to-market, management is currently inclined toward white-labeling health insurance products to gain customer insights and operational experience before committing large-scale capital.

Strategic transformation underway

- **Rebranding to Axis Max Life: Beyond optics, signaling deeper alignment:** The rebranding to Axis Max Life is aimed at expanding brand salience, particularly in non-metros where Axis Bank enjoys stronger recall. Management views this unified identity as a trust-enhancing lever, aiding channel confidence and conversion. It also aligns with the company's ambition to become the No. 3 private life insurer by FY26—a goal further supported by ongoing distribution and product initiatives.
- **Awaiting greenlight on reverse merger:** The company is awaiting IRDAI approval for the final structural piece in its playbook—the reverse merger. This is expected to progress once amendments to the Insurance Act are passed, paving the way for regulatory approval. This merger will allow direct capital market access and better alignment with Axis Bank.
- **Solvency remains adequate; capital strategy in place for growth:** Solvency for MAXLIFE was at 201% at the end of FY25. The company is planning for a debt raise in the near term to support growth as well as fortify its balance sheet. It has guided for a 24-25% VNB margin, with over 25% of surplus likely to be reinvested into the business.

Valuation and view

- MAXLIFE stands at an inflection point, where structural initiatives, executional discipline, and strategic alignment with Axis Bank are converging to create a more resilient, high-quality life insurance franchise. We believe the company offers a compelling growth story within the private life insurance space, underpinned by three pillars: 1) a multi-pronged distribution strategy with strengthening proprietary channels, 2) a sharper product mix that balances margin and scale, and 3) a unique transformation opportunity via the Axis-led rebranding and eventual reverse merger.
- The company's evolution from a bank-partner-led franchise to a multi-engine business is clearly underway. Over the past few years, MAXLIFE has been proactively expanding its agency and direct sales force, with significant investment in digital productivity, quality training, and performance-linked governance frameworks. These efforts are beginning to show results—proprietary channels are gaining traction, ULIP profitability has improved via rider attachment and high sum-assured issuance, and non-par products are witnessing increased demand.
- With bancassurance growth likely to recover as deposit pressure eases and proprietary channels expand deeper into Tier 2+ markets, the medium-term APE growth visibility remains robust in the mid-to-high teens. We expect the company to report FY25-27 APE CAGR of 16%.

- Margin resilience underscores the strength of the company's profitability-focused strategy. Despite challenges in protection uptake and increased competition in non-par, MAXLIFE delivered VNB margin of 24% in FY25. We expect margins to improve to **25.5% by FY27, with FY25-27 VNB CAGR of 20%**. This will be driven by improved ULIP mix economics and a rising share of non-par savings products. Even if pure protection growth remains muted, the inclusion of health riders and segment-focused bundling ensures the product remains relevant and margin accretive.
- The upcoming reverse merger with Axis Bank serves as a potential re-rating catalyst. While currently pending regulatory approval, the merger would: 1) provide MAXLIFE with direct access to capital markets, 2) improve visibility, investor familiarity, and liquidity, 3) cement alignment with the Axis brand—a trusted financial services name with ~5,000 branches, and 4) unlock valuation benchmarking with listed life insurers.
- MAXLIFE's execution on agency productivity, product mix rationalization, and distribution diversification positions it well for the evolving landscape. As protection normalizes and bancassurance regains momentum, margin stability, coupled with structural tailwinds (reverse merger, rebranding), could drive a re-rating. We have increased our estimates on APE growth from 16% earlier to 17% for FY27. From a valuation perspective, we are now ascribing a higher P/EV of 2.3x and reducing the holdco discount to 10% from 20%. The reduction in holdco discount reflects the recent high court verdict in a similar case, which increases the probability of the reverse merger going through. Post the recent rally in the stock, we reiterate our Neutral rating with a revised TP of INR1,750.

MOFSL BFSI picks 2.0: Earnings to gain traction from 2H

Prefer private banks over PSBs; NBFCs and non-lending financials well positioned

FY25 was a challenging year for the BFSI sector. Over the past 12 months (Jun'24-25), Bank Nifty and the Nifty Financial Index posted returns of 8.1% and 14.6%, respectively, compared with 5.4% for the Nifty-50. Several BFSI stocks delivered healthy double-digit returns over the past 12 months, such as HDFCB (17%), ICICI (23%), KMB (23%), FB (17%), PNB HF (24%), HomeFirst (20%), BAF (25%), HDFC Life (28%), BSE (187%) and Nuvama (33%). With a cumulative 100bp reduction in the repo rate by the RBI, FY26 earnings will start on a softer note for banks; however, with a gradual repricing of deposits and benefits from the CRR cut effective Sep'25, we estimate the earnings trajectory to recover from 2HFY26 onward. NBFCs, especially vehicle financiers, will benefit from rate cuts, as lower funding costs will result in NIM expansion of 10-25bp across lenders and help the sector pivot back to growth. Non-lending financials will continue to provide attractive investment opportunities over the year. After the recent outperformance by the sector, we have further narrowed down our top ideas and selected 16 stocks in our MOFSL BFSI top picks 2.0 from our coverage of ~70 names.

Banks: Earnings growth to bottom out in 1HFY26 and recover thereafter

- Banking system has witnessed a sharp deceleration in credit growth in May'25. Credit growth plunged to ~8.9% YoY from avg. 16% seen over the prior three years. This moderation is largely driven by a slowdown in unsecured retail lending as banks have recalibrated their risk appetite amid rising delinquencies in the unsecured retail and MFI segments and high funding costs. An increased focus on asset quality has led to tighter underwriting standards across lenders. Against this backdrop and a modest economic growth outlook, we expect credit growth to remain subdued at 11.5% YoY in FY26E, before gradually recovering to 13% in FY27E.
- The sharp 100bp reduction in repo rates will pose near-term challenges for the sector, as it will drag down lending yields and compress NIMs. However, this pressure will likely be transitory, as a gradual moderation in funding costs and the benefits from the CRR cut will begin to support the NIM trajectory from 2HFY26 onward. Early-stage delinquencies are already showing signs of improvement, and we expect credit costs in the unsecured retail and MFI segments to ease in 2HFY26, especially for mid-sized and MFI-focused banks.
- We, thus, estimate the earnings growth trajectory to stabilize in 2H and gradually start accelerating thereafter. We project earnings growth to recover to ~16.1% in FY27E.

Banks' performance remains divergent; Nifty Financial Index and Bank Nifty outperform Nifty-50

- In the last 12 months, the **Nifty Financial Index** outperformed the Nifty-50 by 9%, while Bank Nifty outperformed by 3%. The divergence in banking stocks' performance continued, with private banks (PVBs) delivering mixed returns and PSU banks significantly underperforming (the PSU Bank Index down 10% during 12-month period).

- **Nifty Private Bank Index** delivered 8.4% returns in the last 12 months, with several large-cap banks such as HDFCB, ICICIBC, and Kotak Bank delivering solid returns of 17%, 23%, and 23%, respectively. Among mid-sized PVBs, Federal Bank, CUB, and KVB led the pack with 17%, 22%, and 14% returns, respectively. AU Bank delivered 20% return over the same period (up ~50% in the past three months). On the other hand, IIB was the biggest underperformer on account of losses related to accounting discrepancies and governance concerns. We upgraded RBL Bank in Apr'25 after a gap of nearly two years and the stock has gained ~20% in recent months.
- **NBFC sector** has seen healthy performance over the recent period, buoyed by rate cuts and an improving earnings outlook. For NBFC-MFIs, while the existing stress on the balance sheet will have to be provided for/written-off, we will start seeing MFI lenders pivoting from moderation to growth in 2HFY26. The interest rate cut cycle, in addition to being margin-accretive for certain products, will also boost demand and loan growth. Shriram Finance, Home First, BAF, Muthoot and Manappuram have delivered returns to the tune of 20% to 51% over the last 12 months.
- **Non-lending financial** sector witnessed a mixed performance in FY25, marked by strong outperformance in 1HFY25 but a slowdown in 2HFY25 due to regulatory impact, weak market sentiment, and uncertain geopolitical and macroeconomic conditions. **Capital market** space has seen strong momentum in recent months after the US tariffs-induced fears waned, with BSE, Angel One and CDSL delivering 42%, 20%, 34% returns, respectively, in the last three months. **Wealth managers** are expected to witness strong inflows and positive MTM impact going forward. Our preferred pick in the space, Nuvama, has delivered 33% returns over the past 12 months. **Life insurance** companies have been able to maintain resilient VNB margins, supported by an improving product mix. Select players are also reporting healthy premium growth. Max Life, HDFC Life and SBI Life have posted steady returns of 60%, 28% and 24%, respectively, over the last 12 months. **Among general insurers**, ICICI Lombard was the only outperformer with 10% return in 12 months.

Private Banks: Select banks leading the pack

- Business momentum has been modest overall, though select banks reported NIM expansion in 4QFY25, breaking away from the trend in earlier quarters. CASA mix improved for large banks amid seasonal CA flows. Growth in corporate was sluggish, and unsecured loan growth moderated sharply amid stress in MFI, PL, and CC, further exerting pressure on portfolio growth and overall lending yields.
- Margins are likely to remain under pressure as loan re-pricing happens in the coming quarters, though the reduction in SA/TD rates and CRR (effective Sep'25) will help to limit the damage.
- Delinquencies were high in unsecured segments, particularly MFI and credit cards, leading to increased provisioning for certain banks. However, early-stage delinquencies are showing signs of improvement, which will help to ease credit cost from 2HFY26. However, larger PVBs with more diversified and secured portfolios continue to fare better.
- We expect PVBs to report an earnings CAGR of ~15% over FY25-27, with growth bottoming out at ~9.7% in FY26E.

- Our preferred BUY-rated ideas include **ICICI, HDFCB, FB, AUBANK, and RBL Bank (upgraded in Apr'25)**. We maintain a Neutral stance on AXSB (downgraded in Jan'24), IIB, IDFC First Bank, and Bandhan Bank.

PSU Banks: Earnings outlook modest amid margin pressure and slow growth

- For PSU banks, RoA has largely matured, and we expect earnings growth to lag loan growth over FY25-27. We, thus, estimate PSU banks' earnings growth to moderate to 7% CAGR over FY25-27 vs. 38% CAGR over FY22-25.
- Notwithstanding the high MCLR-linked book, we expect downward pressure on margins for PSU banks due to muted loan growth and their inability to pass on higher MCLR rates to customers and maneuver the asset mix toward high-yielding products.
- Slippages have remained under control for most banks, reflecting no imminent signs of stress. However, the normalization of credit cost toward FY26 end, along with ECL provisioning requirements, will be closely monitored.
- Profitability outlook for PSU banks has thus weakened compared to prior years due to margin pressure and modest business growth. We, thus, remain selective on PSU banks, though treasury lift may support near-term earnings. SBIN remains our preferred pick.

SFBs: Operating performance to improve from 2H

- **Small finance banks (SFBs)** faced significant challenges, mainly due to elevated stress in MFI and unsecured loans. However, collection efficiencies are seeing some improvement. With the new MFIN guardrails implemented from Apr'25, growth and asset quality could see a near-term hiccup, though the trends are likely to improve materially from 2H onward.
- Margins have witnessed some moderation as funding costs remain high and the mix of high-yielding MFI segment has declined. We estimate near-term NIMs to remain under pressure; however, high composition of fixed-rate loans and bigger room to maneuver SA rates will help a faster decline in funding costs over the medium term. We continue to maintain our preference for AUBANK.

Payments and Cards: Maintain Neutral on both SBICARD and PAYTM

- **SBICARD:** Its gross credit cost declined in 4QFY25, as asset quality stress started easing. Spending growth is expected to pick up, supported by a recovery in corporate spending and steady traction in retail spending. Margins are expected to improve in a calibrated manner as the company benefits from a lower cost of funds. The stock trades at 22x FY27E EPS, closer to our target multiple.
- **PAYTM:** The company reported a recovery in business metrics during FY25 after bearing the brunt of regulatory restrictions. PAYTM remains focused on expanding its merchant base, alongside a recovery in its disbursement run rate. Contribution margin is expected to remain healthy, led by cost control, which will help PAYTM turn EBITDA positive by FY27E. However, we remain watchful of the challenging macro environment, near-term pressure on the UPI market share and weaker profitability in payments business as MDR on UPI transactions now looks unlikely.

NBFCs: Declining rate cycle to aid margin expansion and demand momentum

- NBFCs posted a mixed performance in FY25 amid a challenging macro environment, with an overall 16% YoY growth in AUM. Vehicle financiers led

with 20% YoY growth. Large HFCs grew at a modest pace of 8% YoY, while affordable and small-ticket HFCs saw a 14% YoY increase.

- Macro-economic weakness and weak government capex led to weak demand for CVs. This also led to tightness in collections and higher credit costs across both secured and unsecured product segments. We remain cautiously optimistic about the vehicle finance segment, with NBFCs expected to pivot back to growth (across both secured and unsecured segments) from 2HFY26 onward.
- Fixed-rate lenders like vehicle financiers will continue to see margin expansion in FY26. Large HFCs will have their task cut out to deliver a fine balancing act between loan growth and margins. Affordable HFCs will be relatively better placed on NIM compared to their larger peers.
- Toward the later part of FY25, NBFC-MFIs showed improvement in PAR levels across most states, except for Karnataka and Andhra Pradesh. Collection efficiency in Karnataka is expected to normalize by 1QFY26. MFIs continued to accelerate write-offs to clean up stressed assets and guided for credit costs to remain elevated in 1HFY26, with loan growth expected to rebound in 2HFY26.
- Regulatory headwinds for the NBFC sector now look comfortably behind, with multiple positive and supportive steps taken by the RBI over the last six months. We are positive on the NBFC sector as it will benefit from improved demand momentum and margin expansion in the declining interest rate cycle.

Capital Market: Hit by speed bumps; structural story intact

- Capital market stocks delivered stellar returns in 1H, backed by robust trends across key parameters such as demat account additions, SIP inflows, F&O ADTO surge, and strong markets leading to MTM gains.
- However, 2H saw a complete reversal in trends due to: 1) new regulations implemented in the F&O segment, 2) weak market sentiment bringing down MTM gains, and 3) investor additions. Nevertheless, we remain optimistic about the sector's long-term prospects, given the stark under-penetration and the improving trend of financialization of savings.
- Despite a sharp correction (22%-46%) in our coverage stocks from their respective 52-week highs, ABSL AMC/BSE/MCX/360 One/Prudent are still up 28%/46%/39%/23%/57%, indicating a strong re-rating in these names.
- For AMCs, despite the market correction, SIP inflows (INR267b in May'25) remained strong. Additionally, there has been no sharp pickup in redemptions, indicating resilience in customer behavior for long-term savings through the MF route.
- Going forward, we will be watchful about the impact of changes in expiry day, the outcome of SEBI investigation on HFT (as highlighted by [media reports](#)) and the impact of regulations such as single contract note, among others.

Insurance: Uncertainty on regulations impacting outlook

- Life insurance industry saw modest APE growth of ~1% YoY, driven by a 12% rise in private insurers' sales, while LIC's APE declined by 16%. For FY25, the industry grew 9%, led by IPRULIFE's 39% YoY growth among listed private peers. During 4QFY25, VNB margins expanded across the board, supported by higher sales of ULIPs with greater sum assured and non-linked product recovery. HDFCLIFE and SBI LIFE reported the strongest margin gains.
- Despite weak equity markets dampening ULIP traction and APE growth, traditional product sales and digital channels gained momentum, while bancassurance and agency channels remained stable but grew slowly due to commission changes.

- In a declining interest rate environment, the non-par segment picks up momentum, which enhances the product profile and VNB margins. Further, as the industry needs granular growth, reinforcing agency channels will be the key to future growth.
- General insurance industry continues to experience a low-growth trajectory, due to: 1) weak infrastructure investments, 2) slow credit growth, 3) weak trends in motor sales growth, and 4) 1/n regulation.
- Motor sales are expected to remain weak in FY26. The 1/n regulation will continue to impact reported growth in 1H, but it should unwind, leading to stronger growth in 2H. Recovery in auto sales and capex would be key monitorables for growth prospects among general insurance players.
- On the other hand, health insurance will continue to be a fast-growing space with multiple triggers in place, such as 1) increasing lives covered, 2) price hikes implemented by companies, and 3) increase in sum assured by existing customers. Price hikes should help to maintain or improve loss ratios, while scale benefits should aid in lowering expense ratios, leading to improvement in combined ratios.

MOFSL BFSI picks 2.0: Selective approach

- **Banks:** We continue to prefer large-cap banks, as their valuations appear reasonable given the earnings outlook. These banks have demonstrated a better ability to navigate the rate cut cycle and possess stronger balance sheets. Over FY26/27, we estimate earnings growth of ~9.7%/19.9% for PVBs and 3%/11.6% for PSU banks. We, thus, prefer PVBs over PSU banks, given reasonable valuations and a healthy growth outlook. **ICICIB, HDFCB and SBIN** are our top large-cap picks. In mid-size banks, we prefer **FB and AUBANK**.
- **NBFCs:** Vehicle financiers are expected to benefit from rate cuts, though asset quality will remain under watch. **SHFL** remains our preferred pick here. **Housing Finance:** We maintain our preference for **PNBHF** as we estimate the company to deliver steady profitability and growth. Among affordable players, we like **Home First**, as we believe that an improving product mix (rising mix of LAP) will help to offset any NIM compression due to rate cuts, while overall loan growth remains robust. **Power Financiers:** While valuations are attractive, we are UW on **PFC** and **REC** due to weak loan growth expectations in the current year and slight headwinds on NIM in a declining rate cycle. **SHFL, HomeFirst, PNBHF, LTFH and AB Capital** are our preferred picks among NBFCs.
- **Life and General Insurance:** We like **HDFC Life** for its ability to deliver steady growth and margins, with non-PAR segment doing well. Among general insurers, we prefer **Niva Bupa** for its strong growth, diversified distribution and product mix, and strong management team.
- **Capital Markets:** We prefer **UTI AMC** for its strong fund performance (75% of AUM in Q1 and Q2) and reasonable valuations, followed by **HDFC AMC**. We also like **NUVAMA** in the wealth management space, given our expectation of sustained profitability improvement in its wealth management business. **ANGELONE** remains our preferred pick within the broking space.

Technology

Gen AI deal wins jump 3x to USD1.5b from USD500m in seven quarters

NSEIT has rebounded to its pre-liberation day levels; up 6%

Uncertainty manageable, but waiting on a new technology cycle

ACN upgrades lower end of guidance even as bookings come in weak

Accenture (ACN) reported revenue growth of 7% YoY cc in 3QFY25, beating consensus estimates and coming in at the top end of its quarterly guidance. ACN upgraded the bottom end of its FY25 revenue growth guidance to 6-7% cc (vs. 5-7% earlier; assumes inorganic contribution of 3%, unchanged). Deal bookings in managed services, however, declined 10% YoY, reflecting perhaps the uncertain environment in Apr-May and federal business pressure.

Read-through for Indian IT: ACN's revenue beat on revenues and another upgrade in guidance bode well for Indian IT; however, its commentary around clients diving head-first into GenAI-led programs is in contrast to Indian vendors' stance that deals still remain centered around cost takeout.

For ACN, the impact of a tariff-related pause was milder than earlier feared. This is also corroborated by movement in stock prices of Indian IT services companies over the past two months — the broader Nifty IT Index is now 6% above its pre-liberation day level, indicating that the fears of US tariffs have not materialized and the market has quickly digested this issue. As we argue in our note dated 28th Apr'25 titled [“What lies ahead for Indian IT: The good, the bad, and the unlikely”](#), a re-rating in the sector depends on a new technology cycle emerging, client spends moving from ‘run-the-business’ spends to ‘change-the-business’ spends and meaningful earning upgrades.

Upgrades bottom end of FY25 guidance to 6-7% cc growth (vs. 5-7% earlier); outsourcing deal wins down 10% YoY

- **Revenue performance:** Revenue stood at USD17.7b, up 7% YoY CC (~4% organic YoY CC) in 3QFY25, at the upper end of the guided range of 3% to 7%. Managed services revenue grew 9% YoY CC, while consulting services grew 6% YoY CC.
- **Bookings:** ACN reported outsourcing bookings of USD10.62b, down 10% YoY, while consulting bookings declined 1.3% to USD9.1b. The book-to-bill ratio came in at 1.2x in 3QFY25, in line with the average of 1.2x over the past four quarters. Generative AI new bookings stood at USD1.5b.
- **Revenue guidance:** ACN expects 4QFY25 revenue growth in the range of 1% to 5% YoY CC and has raised the lower end of its FY25 guidance to **6-7% CC from 5-7% CC** provided in the previous quarter. **With an estimated FY25 inorganic contribution of ~3%, the organic growth guidance for FY25 stands at 3-4% cc.**
- **Vertical-wise performance:** Growth was led by Financial Services (13% YoY CC) and Healthcare & Public Services/Products (7% YoY CC), while Communications/Resources verticals grew 5%/4% YoY CC.
- **Operating margin performance:** EBIT margin was up 90bp YoY at 16.8% in 3Q. For FY25, margin is expected at ~15.6%, an expansion of 80bp YoY.
- **Headcount trend:** ACN workforce decreased 1% QoQ at ~790k, attrition increased by 300bp to 16% (vs. 13% in 2Q), and utilization stood at 92%.

Key highlights from the management commentary

- Elevated global uncertainty continues vs. CY24. Clients are navigating multiple simultaneous challenges, such as economic volatility, geopolitical shifts, and changing customer behavior.
- Pipeline remains strong going into 4Q, with a focus on cost, digital core, and AI-driven efficiency. Clients have moved from pause to focus and leapfrog, prioritizing large-scale transformations and AI-led reinvention.
- Organic momentum is improving. 3Q strength led to an upgrade in lower end of FY25 guidance (from 5-7% CC to 6-7% CC). Inorganic contribution is pegged at ~3%, implying organic growth of 3-4% CC.
- Federal business had immaterial impact on revenue and bookings.
- Clients are scaling up GenAI to build cognitive enterprise capabilities. AI agents, automation, digital twins, and predictive ops are becoming mainstream.
- ACN announced a new integrated “Reinvention Services” unit (effective 1st Sep’25): all services (Strategy, Tech, Ops, Song) unified for faster GenAI scale-up and solutions.
- There is no change in ACN’s acquisition policy. The company remains disciplined and will pursue acquisitions when there is a clear opportunity to expand capabilities or addressable market. It expects ~3% revenue contribution from acquisitions in FY25 and ~2% in the coming year.
- The company returned at least USD2.7b in cash to shareholders through dividends and share repurchases.

Gen AI deal wins jump 3x to USD1.5b from USD500m in seven quarters

NSEIT has rebounded to its pre-liberation day levels; up 6%

Automobiles

Two-wheeler industry underperforms expectations

HMSI and TVS lead in 2Ws; MM and Toyota outperform in PVs

- Key auto segments continued to face demand weakness over Apr-May'25: PV growth at 3.6% and 2W ICE volumes down 9.8%.
- HMSI emerged as the market leader in the 2W ICE segment during Apr-May'25.
- Within the motorcycles category, all segments except for >250cc posted a YoY decline in the first two months.
- In motorcycles, two key trends to highlight are: 1) HMSI has regained almost its entire share in the 125cc segment, and 2) TVS has, for the first time, emerged as market leader in the 150-250cc segment during the first two months of FY26.
- In PVs, UV contribution increased to 67% in the first two months. MM, Toyota, and Kia outperformed in the PVs segment.
- **The FY26 outlook across most auto segments remains in the low- to mid-single digit mark. There is a downside risk to our 2W growth estimates if demand fails to pick up in the coming quarters. Our top picks in auto OEMs are MSIL, MM, and Hyundai.**

ICE 2Ws: HMSI now market leader in domestic 2W ICE on YTD basis

- The domestic 2W ICE industry, which had been outperforming other segments until recently, is now witnessing weak demand trends. For the first two months, industry sales declined 10% YoY.
- Within this category, motorcycle sales were down 12% YoY, while scooter sales were down 6% YoY.
- HMSI is now a market leader in the domestic 2W ICE segment, with a 28% share for YTD FY26 – flat YoY. HMCL has seen a sharp decline, with its share falling 430bp YoY to 25.7%.
- TVS, RE, and Suzuki have outperformed the industry so far on a YTD basis.

Segmental trends: Scooter segment outperforms motorcycles on YTD basis

Motorcycle segment:

- As highlighted above, the domestic motorcycle industry declined 12% YoY on a YTD basis.
- In motorcycles, RE, TVS, and HMSI outperformed the industry, while HMCL underperformed.
- Among gainers: HMSI gained 270bp to 21.3%, TVSL gained 180bp to 12.3%, and RE gained 155bp to 7.9%.
- HMCL saw the steepest share loss on a YTD basis: down ~520bp to 38%.

100cc segment:

- This segment continues to underperform, recording a 20.6% YoY decline in the first two months of the fiscal.
- While HMSI saw a sharp YoY decline of 48% in this segment, BJAUT posted a 25% YoY decline in the first two months.
- Even HMCL saw a 19% YoY decline.
- Only TVS Motors was able to sustain sales at last year's level in the first two months.
- HMCL gained an additional 160bp share in this segment, reaching its highest-ever share at ~81%.
- HMSI lost the most share in this segment, down 250bp to 4.7% in the first two months of FY26.
- Even Splendor sales for HMCL declined 17% YoY, with the steepest drop seen in Passion, which was down 43% in Apr-May'25.
- HMSI appears to have discontinued its Dream series, with no sales recorded in the first two months. Even Livo (-45%) and Shine100 (-32%) saw a sharp decline in volumes during Apr-May'25.

125cc segment:

- While the 125cc segment continued to outperform the motorcycle industry, it posted a 2% YoY decline during Apr-May'25.
- However, HMSI outperformed peers in this segment, posting a strong 20% YoY growth in the first two months.
- HMCL saw the steepest decline in volumes in this segment, down 43% YoY. A major reason for this drop was the sharp 85% decline in Glamor volumes during Apr-May'25, ahead of its anticipated new launch.
- As a result, HMSI gained 900bp share in this segment, reaching 49.5% and recovering back most of its lost market share in the segment over the years.
- Meanwhile, HMCL lost 790bp share, dropping to 10.8%.
- Among other notable products, Raider sales declined 11% YoY, while Pulsar 125 sales saw a 2% YoY drop.
- Sales of BJAUT's CNG bike, Freedom, have dropped to a monthly run rate of just 1k units.

150-250cc segment:

- This segment underperformed the overall motorcycle segment, posting a 12.6% YoY decline during Apr-May'25.
- Among notable top peers, only TVS outperformed in this segment, delivering a strong 20% YoY growth, while all other peers saw double-digit declines.
- For TVS, Apache grew 13.5% YoY, while Ronin saw over 2.5x growth in the first two months of FY26.
- As a result, TVS has emerged as the market leader in this segment for the first time ever, with a 31.9% share, up 870bp YoY.
- BJAUT slipped to the second position, with its share declining 280bp to 30%.
- Yamaha saw a 500bp loss in share to 15.6%, while HMSI saw a marginal dip to 19.6%.

>250cc segment:

- RE posted a steady 9.5% YoY growth in domestic sales during Apr-May'25. Growth was primarily driven by the Bullet 350, which saw a strong 50% growth in the first two months. On the other hand, the rest of the 350cc portfolio (except for Bullet) grew just 2% YoY.
- RE's 450cc segment sales declined 17% YoY despite the launch of the Guerilla 450.
- Among peers, Triumph posted a strong ~50% YoY growth, reaching 6.5k units over Apr-May'25. On the other hand, HD X440 is averaging just under 500 units per month, while the Maverick440 has sold only 9 units in the first two months of the fiscal.
- In this segment, HMSI is currently selling around 3.5k units per month.

Scooters ICE segment

- As highlighted above, the scooters segment posted a 5.7% YoY decline in FY26.
- Market leader HMSI significantly underperformed, posting an 18% YoY decline.
- On the other hand, both TVS and Suzuki continued to outperform, posting 16.6%/13.5% YoY growth.
- As a result, while TVS gained 520bp in market share, reaching 27.2%, Suzuki gained 345bp to reach 20.4%.
- TVS's upgraded Jupiter110 continues to experience strong demand, registering 31% YoY growth over Apr-May'25.
- On the other hand, market leader HMSI lost 680bp share, reaching 44.1%. HMCL continued to underperform, with its share declining 120bp to 3.6%

PV update: UV mix now stands at 67%

- The PV industry grew 1.5% YoY over Apr-May'25.
- UVs posted a 9% growth, while cars recorded a 12.6% YoY decline over Apr-May'25. As a result, the UV mix in PVs inched up to 67% in FY26 (from 65% in FY25).
- Within PVs, MM (+24.4%), Toyota (+26.8%), and Kia (+16.4%) were the key growth drivers.
- As a result, MM gained 280bp in market share to reach 15.1%; Toyota gained 155bp to reach 7.8%, and Kia gained 85bp to reach 6.6%.
- On the other hand, while MSIL lost 170bp, reaching 39.6%, Hyundai/TTMT lost around 180bp/130bp share.

Car segment:

- As highlighted above, the car segment declined 12.6% YoY in the first two months of FY26, with its contribution declining to 29.3% in PVs.
- Within cars, the mid-sized sedan segment remained the worst hit, experiencing a 42% YoY decline in volumes. Similarly, the mini segment saw a 38% YoY decline during Apr-May'25.
- MSIL further strengthened its position in this segment by gaining about 370bp share to 67.3%.

UV segment:

- As highlighted above, the UV segment posted a 9.1% YoY growth over Apr-May'25.
- Toyota (+33.9%), MM (+24.4%), and Kia (+16.4%) outperformed industry growth.
- MM gained 280bp share to 22.6%, while Toyota gained 180bp share to 9.6%
- On the other hand, Hyundai lost 260bp share to 13.1%, while MSIL lost 150bp share to 24.6%
- Key growth drivers for MM over Apr-May were Thar (+77% YoY), led by strong demand for the Roxx variant; XUV 700 (+19% YoY); and its new EVs (sold 7k units in the first two months and 4k units in May'25).
- For MSIL, a key setback during Apr-May'25 was the 29% YoY decline in Grand Vitara volumes to 12.3k units, likely due to anticipation around an upcoming launch in a similar segment. The model is also facing increased competition from Toyota's Urban Cruiser Hyryder, which recorded almost similar sales during this period.
- Growth for Kia was primarily driven by the new Syros, which sold 7.6k units in the first two months.
- Skoda Kylaq also received a good response, currently averaging ~5k units per month.

Valuation and view

- The outlook for most auto segments remains in the low- to mid-single digit mark for FY26.
- Demand across 2Ws and PVs has remained weak in the first two months of the fiscal, with the 2W industry substantially lagging behind industry growth expectations of 6-7% for FY26E. Hence, there is a downside risk to our 2W growth estimates if demand fails to pick up in the coming quarters.
- MSIL is our top pick, given its continued export momentum and an expected revival in the domestic UV share following its anticipated launch. We like MM for its healthy demand momentum in both SUVs and tractors for FY26. We also like Hyundai as it appears well-aligned to benefit from industry trends toward UVs.

Domestic 2W volumes declined 10% YoY YTD FY26

Total domestic 2Ws ICE	May-25	YoY (%)	YTD FY26	YoY (%)
HMCL	4,80,636	5.2	7,62,044	-22.7
HMSI	4,16,574	16.3	8,38,665	-10.0

Trade deficit narrows in May'25

Led by a decline in imports

- India's trade performance in May'25 showed encouraging signs, supported by a narrower goods deficit, a resilient services surplus, and robust electronic goods exports.
- Merchandise exports stood at USD38.7b in May'25, registering a decline of 2.2% YoY (lowest in four months) from USD39.6b in May'24, but slightly better than USD38.5b in Apr'25. The decline in merchandise exports was led by the four-month lowest growth in petroleum exports (-30.3% YoY in May'25 vs. 4.7%/38.3% in Apr'25/May'24) and three-month lowest growth in gems & jewelry exports (-13.9% YoY in May'25 vs. 10.7%/-2.2% in Apr'25/May'24). On the other hand, non-oil-non-gems & jewelry exports grew decently at 6.9 % YoY in May'25 from 10.1%/9.3% in Apr'25/May'24 (Exhibit 1).
- Major growth drivers of merchandise exports in May'25 include Electronic Goods, Organic & Inorganic Chemicals, Drugs & Pharmaceuticals, Marine Products, and RMG of all Textiles. Electronic Goods exports increased by 54.1%, rising from USD2.97b in May'24 to USD4.57b in May'25.
- Merchandise imports declined 1.7% to USD61b in May'25, down from USD65b (19% YoY) in Apr'25 and USD62b (7.3% YoY) in May'24. Imports of Pulses (-51.9%), Transport Equipment (-28.2%), Fertilizers, Crude & Manufactured (-26.6%), Petroleum, Crude & Products (-26.1%), Newsprint (-20.6%), Coal, Coke & Briquettes (-19.4%), Pearls, Precious & Semi-Precious Stones (-18.5%), Ores & Other Minerals (-13.5%), Gold (-12.6%), and Vegetable Oil (-3.6%) recorded negative growth in May'25 over the corresponding month of last year.
- Consequently, the merchandise trade deficit narrowed to USD21.9b in May'25 (vs. USD22.1b in May'24 and USD26.4b in Apr'25), mainly led by a decline in imports. The merchandise trade deficit for May'25 was lower than the market consensus of USD25b (Exhibit 3).
- In Apr-May'25, exports grew 3.1% vs. 0.1% in FY25. On the other hand, imports grew faster at 8.1% in Apr-May'25 vs. 6.2% in FY25 (Exhibit 4).
- India is projected to exceed USD900b in combined exports (goods + services) in FY26, signaling strong trade momentum. However, global uncertainties such as oil price volatility, evolving US tariffs, and China's export restrictions (which may disrupt electronics supply chains) pose downside risks.

Exhibit 1: Exports contracted 2.2% YoY in May'25

Source: Ministry of Commerce and Industry, MOFSL

Exhibit 2: Imports declined 1.7% YoY in May'25

Source: Ministry of Commerce and Industry, MOFSL

Exhibit 3: Trade deficit narrowed to USD21.9b in May'25

Exhibit 4: Imports grew faster than exports in Apr-May'25

HDB Financial Services: Capital Raised Via Fresh Issue Will Last 3-4 Years For Growth; G Ramesh, MD & CEO

- Present in 1,170+ cities with 1,700+ standalone branches.
- Operates independently of HDFC Bank with own sourcing & risk control.
- Raising ₹2,500cr to fuel growth and strengthen capital.
- Regulatory overhang exists, but business model ensures continuity.

[→ Read More](#)

DreamFolks Service: Fully Integrated With All The Banks We Have Onboard; Liberatha Peter Kallat, Chairperson and MD

- No client exits; ongoing talks are standard commercial negotiations.
- Past tech issues resolved; services running smoothly.
- Expanding into enterprise, social clubs, and mall lounges.
- Targeting 20% CAGR till FY26; non-lounge services to grow rapidly.

[→ Read More](#)

Britannia: Major Focus Is On Protein And Adjacency Products; Varun Berry, MD & CEO

- Expanding into high-protein categories like cheese and Greek yogurt.
- Targeting ₹25,000 Cr revenue in 3–4 years.
- Focus on clean-label, health-driven products
- Balancing agility with large-scale execution.

[→ Read More](#)

Paras Defence: Exposure To Israel Is More Focussed On Tech Transfers Rather Than Exports; Amit Mahajan, Director

- Minimal Israel exposure; exports form 10–15% of revenue, mostly diversified.
- Tech tie-ups with Israel face minor delays; focus on future-ready systems like hydrogen drones.
- 80–90% of products are developed in-house, ensuring tech independence.
- Core role in India's air defense; rising domestic focus with exports as long-term upside.

[→ Read More](#)

KEI Industries: Aiming for 28% CAGR Growth in the years to come.; Anil Gupta, CMD

- Entered high-voltage cable biz via Brook Cable tie-up; expands tech capabilities.
- Sanand plant to drive ₹6,000cr sales boost by FY27–28.
- Focus sectors: solar, wind, data centers, and transmission.
- Strong export potential backed by India's geo-strategic edge.

*In case the recommendation given by the Research Analyst is inconsistent with the investment rating legend for a continuous period of 30 days, the Research Analyst shall within following 30 days take appropriate measures to make the recommendation consistent with the investment rating legend.

Disclosures:

The following Disclosures are being made in compliance with the SEBI Research Analyst Regulations 2014 (herein after referred to as the Regulations).

Motilal Oswal Financial Services Ltd. (MOFSL) is a SEBI Registered Research Analyst having registration no. INH000000412. MOFSL, the Research Entity (RE) as defined in the Regulations, is engaged in the business of providing Stock broking services, Depository participant services & distribution of various financial products. MOFSL is a listed public company, the details in respect of which are available on www.motilaloswal.com. MOFSL (erstwhile Motilal Oswal Securities Limited - MOSL) is registered with the Securities & Exchange Board of India (SEBI) and is a registered Trading Member with National Stock Exchange of India Ltd. (NSE) and Bombay Stock Exchange Limited (BSE), Multi Commodity Exchange of India Limited (MCX) and National Commodity & Derivatives Exchange Limited (NCDEX) for its stock broking activities & is Depository participant with Central Depository Services Limited (CDSL) National Securities Depository Limited (NSDL), NERL, COMRIS and CCRL and is member of Association of Mutual Funds of India (AMFI) for distribution of financial products and Insurance Regulatory & Development Authority of India (IRDA) as Corporate Agent for insurance products. Details of associate entities of Motilal Oswal Financial Services Ltd. are available on the website at <http://online.reports.motilaloswal.com/Dormant/documents/Associate%20Details.pdf>

Details of pending Enquiry Proceedings of Motilal Oswal Financial Services Limited are available on the website at <https://galaxy.motilaloswal.com/ResearchAnalyst/PublishViewLitigation.aspx>

MOFSL, its associates, Research Analyst or their relatives may have any financial interest in the subject company. MOFSL and/or its associates and/or Research Analyst or their relatives may have actual beneficial ownership of 1% or more securities in the subject company at the end of the month immediately preceding the date of publication of the Research Report or date of the public appearance. MOFSL and its associate company(ies), their directors and Research Analyst and their relatives may have any other potential conflict of interests at the time of publication of the research report or at the time of public appearance, however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

In the past 12 months, MOFSL or any of its associates may have:

- received any compensation/other benefits from the subject company of this report
- managed or co-managed public offering of securities from subject company of this research report,
- received compensation for investment banking or merchant banking or brokerage services from subject company of this research report,
- received compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company of this research report.

- MOFSL and its associates have not received any compensation or other benefits from the subject company or third party in connection with the research report.
- Subject Company may have been a client of MOFSL or its associates during twelve months preceding the date of distribution of the research report.
- Research Analyst may have served as director/officer/employee in the subject company.
- MOFSL and research analyst may engage in market making activity for the subject company.

MOFSL and its associate company(ies), and Research Analyst and their relatives from time to time may have:

a) a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein.

(b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

Above disclosures include beneficial holdings lying in demat account of MOFSL which are opened for proprietary investments only. While calculating beneficial holdings, It does not consider demat accounts which are opened in name of MOFSL for other purposes (i.e holding client securities, collaterals, error trades etc.). MOFSL also earns DP income from clients which are not considered in above disclosures.

To enhance transparency, MOFSL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report. MOFSL and / or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOFSL may have a potential conflict of interest that may affect the objectivity of this report.

Terms & Conditions:

This report has been prepared by MOFSL and is meant for sole use by the recipient and not for circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of MOFSL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. MOFSL will not treat recipients as customers by virtue of their receiving this report.

Analyst Certification

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report.

Disclosure of Interest Statement

Analyst ownership of the stock

Companies where there is interest

No

A graph of daily closing prices of securities is available at www.nseindia.com, www.bseindia.com. Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOFSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOFSL research activity and therefore it can have an independent view with regards to subject company for which Research Team have expressed their views.

Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL & its group companies to registration or licensing requirements within such jurisdictions.

For Hong Kong:

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Financial Services Limited (SEBI Reg No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

For U.S.

MOTILAL Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the "1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts"), and under

applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.

For Singapore

In Singapore, this report is being distributed by Motilal Oswal Capital Markets (Singapore) Pte. Ltd. ("MOCMSPL") (UEN 201129401Z), which is a holder of a capital markets services license and an exempt financial adviser in Singapore. This report is distributed solely to persons who (a) qualify as "institutional investors" as defined in section 4A(1)(c) of the Securities and Futures Act of Singapore ("SFA") or (b) are considered "accredited investors" as defined in section 2(1) of the Financial Advisers Regulations of Singapore read with section 4A(1)(a) of the SFA. Accordingly, if a recipient is neither an "institutional investor" nor an "accredited investor", they must immediately discontinue any use of this Report and inform MOCMSPL.

In respect of any matter arising from or in connection with the research you could contact the following representatives of MOCMSPL. In case of grievances for any of the services rendered by MOCMSPL write to grievances@motilaloswal.com.

Disclaimer:

The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent. This report and information herein is solely for informational purpose and may not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult its own advisors to determine the merits and risks of such an investment. The investment discussed or views expressed may not be suitable for all investors. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. No representation or warranty, express or implied, is made as to the accuracy, completeness or fairness of the information and opinions contained in this document. The Disclosures of Interest Statement incorporated in this document is provided solely to enhance the transparency and should not be treated as endorsement of the views expressed in the report. This information is subject to change without any prior notice. The Company reserves the right to make modifications and alternations to this statement as may be required from time to time without any prior approval. MOFSL, its associates, their directors and the employees may from time to time, effect or have effected an own account transaction in, or deal as principal or agent in or for the securities mentioned in this document. They may perform or seek to perform investment banking or other services for, or solicit investment banking or other business from, any company referred to in this report. Each of these entities functions as a separate, distinct and independent of each other. The recipient should take this into account before interpreting the document. This report has been prepared on the basis of information that is already available in publicly accessible media or developed through analysis of MOFSL. The views expressed are those of the analyst, and the Company may or may not subscribe to all the views expressed therein. This document is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform themselves of and to observe such restriction. Neither the Firm, nor its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits that may arise from or in connection with the use of the information. The person accessing this information specifically agrees to exempt MOFSL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOFSL or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOFSL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.
