## Market Review for 12.6.19

**Nifty (11966)** we said 'technically now 11970-12026 is a possibility as long as 11870 holds' the Nifty unfolded as expected and saw the high near our target and has closed in the green...technically the up-move since the past 3 days looks reactive in nature...technically now 12026-12100 is a possibility...and crucial support to watch would be 11893...

**Nifty Bank (31265)** we said 'technically now the reference points on the upside are 31342-31445-31536 and supports exists at 30539' the Nifty Bank unfolded strong as expected and has closed in the green...technically now 31445-31536 is a possibility...and crucial support to watch would be 30860...
