## Market Review for 30.7.19

**Nifty (11189)** we said 'technically now 11400 is a possibility as long as 11208 holds' the Nifty opened high but traded down to breach 11208 to close in the red but taking care to see the low near important support of 11150...next strong support 11000...strong resistance is at 11321...

**Nifty Bank (29296)** we said 'technically 29608 is a possibility as long as 29013 holds' the Nifty Bank near our resistance and traded down to closed flat for the day...technically 29013 is a strong support and resistance exists at 29608...
